Date 7.1.68

Dear Dr. Sukumaran,

Many thanks for your letter HVG/9087/67.

of 21st Dec 67. I will refer Shri. Sardesai to Dr. Baxi in due course. They were busy with some work & will be seeing you. In case they see your earlier, please direct them to Dr. Baxi & oblige.

To day I am referring Baba Wabid to you

To me he appears to be a carrier of Haemolytic Anaemia, most probably Thalassaemia minor. I will feel obliged if you kindly do the necessary investigations to establish diagnosis.

In absence of facilities of Starch Block Electrophoresis A2 increase could not be done here.

If you need the family members for complete investigations please inform them & advise.

P.T.O.

= Contd =

You have already confirmed the diagnosis as Thalassemia minor in case of Miss Manju Jari Pate last year. Her brother also appears to be a subject of Thalassemia minima - They will be most probably seeing you at the end of this month or probably next month for the investigations at your place & will be writing to you in due course -

Wishing you a very happy & prosperous New Year & with kindest regards,

Yours sincerely

A. S. Parande

Date 7.9.68

Dear Mr. Sukumaran,
Re. Patient Baby MEHAJABEEN - 9/12 YRS
Rajawthani Mohmedn
Herewith a bolter for you.

A very interesting case of the Familial
Hyperlipaemia (with hepatosplenomegaly
Xanthomatous Skin Lesion & lipaemia -
schinialis Shows in addition a blood
picture of haemolytic Anaemia, in my
opinion Thalassemia Major -

Kindly do Hb electrophoresis & Tests
also to show increase in A₂ fraction &
F. Data follows separately

Please do the needful & oblige
With kindest regards,
P.T.O. Yours Sincerely
A.S. Parande

P. S.

If it is possible kindly also
arrange to examine the Serum
of the same patient of SF fractions
of lipids. (Ultra centrifuge)

Asst G

Dear Dr. Parande,

Thank you for ~~send~~ referring
to me the blood specimen from your
interesting case (Baby MEHAJBEEN).

This specimen was received on the
afternoon of 9-9-68. When I attempted
to wash the blood to prepare haemolysate
it was found that the sample was
completely lysed. Hence I am sorry
to say that no investigation could be
done. We do not undertake any ~~lipid~~
studies on lipids and so I am unable
to anything on the serum sample. You
may repeat the blood sample
for haemoglobin studies.
