Professor H. J. Bhabha
Tata Institute of Fundamental Research
Apollo Pier Road,
Bombay 1, India

Dear Bhabha:

I have just received a letter from Bernard Peters announcing the visit of Mr. Sreekantan. Of course we shall be happy to have him as a guest of our laboratory. It would be best if he would arrange his visit to Colorado during the summer months, because much more is going on at Echo Lake in summer than in winter. However, our group is operating the multiplate cloud chamber at Echo Lake all year round.

Some time ago I wrote Bernard Peters a letter concerning Yash Pal. I am enclosing a copy of it in case Bernard has not received this letter before leaving for Europe.

With best wishes,

Sincerely yours,
sd Bruno Rossi
