

# When Special People Touch Our Lives

When special people touch our lives,  
then suddenly we see  
how beautiful and wonderful  
our world can really be.

They show us that our special hopes  
and dreams can take us far,  
by helping us look inward  
and believe in who we are.

They bless us with their love and joy  
through everything they give--  
When special people touch our lives,  
they teach us how to live.

AMANDA BRADLEY

Mr. Deb Roy (Sir)

There are some special people  
We meet along life's way  
Who make our journey brighter  
By things they do and say.  
And because you're.

that kind of person.

May your day and life be blessed  
With all God's special gifts  
That make you happiest.

Happy Birthday

Champak  
&

Bhaskar

**Snow Leopard** (*Panthera uncia*)

**Length** : 200 cm (including 90 cm tail)

Ranging along the entire Himalayan chain as well as the central Asian highlands, the rare and elusive Snow Leopard lives above the tree-line at 3000 mt and seldom comes below 2000 mt in search of its prey, viz. wild sheep and goats, musk deer, hare and other rodents. Despite the inhospitability of its domain, the Snow Leopard is persistently hunted for its beautifully spotted pelt, which fetches astronomical prices in the international fur trade.

Dear Sanjoy:

Warm and heartfelt Happy Christmas and Prosperous New Year, without headaches.

I wonder what happened to my letter to You and the other two letters for the admission of your little son. Did you get them and were they successful? Kindly let me know.

I am feeling alright and willing to return, but I prefer to listen to the advice of my friends, regarding the moment of my return. I know of events in Assam. What you say, when shall I make a try to return? - Let me know. Of course I must stop at Delhi and then try. Regards to Monju and your sons. May God bless You.

Affectionately : *Dr. Joseph Sahjanta*

Dear Mamma,

To

Hope you're all fine & in great spirits after the Gujarat trip. I came to Leh yesterday & am leaving for Siachen glacier tomorrow. I shall be away for 4-5 months, & will let you know my address from there. Leh is a lovely place.

I landed in a temperature of  $-70^{\circ}\text{C}$ ! But it's great fun.

A totally different world exists here. Hope to show you the snaps sometime.

Baba is not very well, but currently there's nothing I can do for him. Do cheer him up from time to time. It really helps him a lot. No more now. With love from you & mami.  
- Bappa.

My dear Hanjaji & Debraj ~~brothers~~, 6-5-93  
Starkville

Thank you very much for your  
kind letter.

Sudhakar was talking about you  
so much with me before I left for U.S.A to help  
my sons (with their babies) saying that how honest  
officer you are and an excellent ~~pro~~ human being.

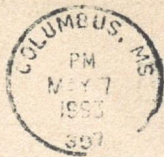

I don't know what else to write  
I only have good memories of him - Fortunately  
Sudhakar trained his sons and shaped them into  
very good men like him - I am ~~not~~ lucky that way  
~~that~~ with best regards to you both - yours sincerely  
Uma.

**Crested Tree Swift (*Hemiprocne longipennis*)**

A prominent crest adorns this slender bird, a little smaller than a Bulbul. The male sports a chestnut chin and throat, which are grey in the female. Found in the deciduous forests of tropical Asia, this slender swift builds a small nest of scraps of bark and feathers (gummed together with its saliva) high in a tree. Tiny flying insects, caught on the wing form its main diet.
