Chetpat, Madras-31
Dated 28th March'59

Dear friend,

After a long lapse of time I am offering my salutations to you. Frequent letters do really help to keep each others movements known, but I felt my letters will be an infliction on your time and hence I refrained from writing to you, though, You had kindly offered to give me a certificate which I needed from you nearly four years ago.

Presently I am writing this letter to ascertain from you some information regarding Metrology- Frankly, this term was not known to me until the other day, my son who is in the final inspection section of Perkins Diesel Engine Manufacture told me about it and that I could get some information from the National Physical Laboratory. The boy is just 22 but he has putting nearly three years of work here and appears to have received acclamation. He is keen on studying the trends on Metrology and desires to have the journals on this subject and if the National Physical Laboratories are publishing any journal on the subject, I would like to subscribe to it and receive the issues regularly. I am sure you can help me in this matter.

I am still pursuing my favourite subject of Medicine and I have very nearly given up journalism. Yet, the seed once sown sprouts and grows into a tree which cannot be easily axed and if axed fresh branches sprout out and keep the tree green, i.e. the roots do not die out.

My longing is to re-acquaint myself with Delhi in the new set-up and I do not know when and how it will be possible.

With my best regards,

Yours Very truly

(R.V. NARAYAN)

Dr.K.S.Krishnan,
Director,
National Physical Laboratories,
New Delhi.
