Re: Author abstract No. 808509

Dear Colleague:

We should like to include in the Zentralblatt für Mathematik an abstract of your paper mentioned on the enclosed form.

The Zentralblatt is changing over gradually to the use of author abstracts to satisfy the continuously increasing demand for more rapid and comprehensive information about mathematical research. We hope that this procedure, officially supported by the International Mathematical Union, will lead to a certain degree of differentiation and complementation between the mathematical reviewing/abstracting journals. Authors' abstracts are normally published in the Zentralblatt within ten weeks of receipt. Your abstract should not be a short summary but should comply in size and form with a normal review (although criticism will not be expected). An abstract may be amended if the author has meanwhile obtained further relevant information. The abstract may be written in English, French or German.

If you cannot send us your abstract within a period of eight weeks, we should very much appreciate it if you would return the enclosed form at your earliest convenience.

Hoping that we shall have your support, we remain

Yours faithfully

*Walter Romberg*
