

FERGUSSON COLLEGE,
POONA.

8th July 1932.

It was a real pleasure to me, to meet Mr. B. S. Madhavrao and make his acquaintance when I last went to Bangalore in connection with a meeting of the - Mathematics Board of the Mysore University. He is one of the very few Professors ~~in~~ of Mathematics in India, and easily one of the best, who have kept -- themselves in touch with modern developments in -- Mathematical Physics. I learn that he is thinking of going to Germany and prosecute further studies to deepen his knowledge by working with men who are actually in the front line of the research field. Nothing better could be desired, and I envy him.

One advantage which Mr. Madhavrao starts with is that he need not spend any time in mere spade work. - Thoroughly advanced as he is in the subject he can do a lot even during a brief stay of a year or two.
