My dear friend

I do not know whether you will receive my letter or not; hence I am not writing to you in detail, because to do so will be only gangingizing. You might have altogether forgotten me. Do you remember a class fellow of yours at Calcutta I ~~to you~~ I read with you ~~is~~ in Calcutta in Mathematics class. I was the only Matric reading with you. However, I went to Paris in 1936 and Passed D.Sc with a great honours in Mathematics in 1939.

Please write to me in detail about you and write to me as soon as possible. Just today I came to know your address and ~~at~~ all at once my past ~~friendship~~ pleasant talks ^{with you} came before my mental eyes. Oh! I was so glad to know your address. Please write to me at once. Please do not gangingize [gangingization] at Calcutta.

with respectful regard

Yours
Sudh Upadhyaya

My dear friend

I wrote a very long letter to you yesterday. As yet I have not been settled as my present Post is not a permanent one. Can you help me to get any job there? Yes please do help me as you once helped me in Calcutta when you offered me your room for me? Have you forgotten it? If I begin to write books in Hindi once again I will gain my livelihood, but I wish to stick to Mathematics. Can I get any thing in any capacity in the Science Institute? There was a vacancy in the Science Institute for Librarian & it was advertised in the "Leader". I applied for it and some enquiries were also ~~made~~ made from there, but I heard nothing again.

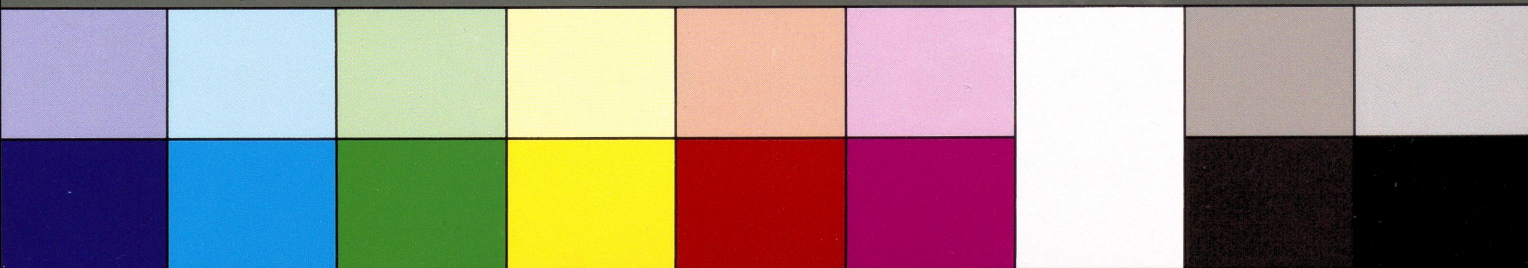

Please speak to ~~the~~ Sir Raman about me and ask him if he can do any thing for me there. I forgot to write to you that it was Sir Raman who recommended my case to L. U. and also to ~~Dr. Chandra~~
Chandra menon

Please ask him on my behalf to help me once again. What about the Post Librarian there? Is it already filled?

Do you think my coming there will help me in any way. If so I will come and thus see you also once again.

If you think that I can get nothing else there, do you think I can get a small amount for doing research work in

Mathematics. Please answer ~~these~~ these things in detail so that I may make up my mind as to what should be done next. I am very much troubled these days, very much disturbed on account of un-settled life. Your letter will give me much pleasure and consolation.

I shall be anxiously waiting for your reply. Yes please reply as soon as possible.

with respectful regards
yours truly
Sudhakar Dasgupta

My dear friend

Words fail to express the joy

I felt to read your letter. Meeting with you at Calcutta and all the

other scenes came before ~~me~~ ^{me at once} ~~my mind~~. I am extremely glad to learn that you have taken a Doctorate. Mr R.S. Verma

(a lecturer here) gave me your address. Yes I remember all those lines

quoted by you "ममिमा इति". I am glad also to learn that

you have been gangotizing even now with Dr Gangoli

(Bhamani Doctor), the inventor of the theory itself.

I remained about one year more at Calcutta after

you left it. Mr Chintamani, the then Minister of

education, came to know that my papers were published

Mathe Annalen. L.M.S. London, in America, France

etc., he became very glad and recommended

my case to Lucknow and Allahabad Universities.

~~At~~ Allahabad University decided to send me to England

at its expence and Lucknow University wanted to give

me 100 P.M as scholarship and then a lectureship

in the University. I decided to come to L.U and rejected to go to Eng

Scholar in L.U. but on account of Dr G. Prasad ^{late}

I could not be appointed. Hence I was nowhere

again. Then I had to work for my bread

and could not get any thing in Mathematics

as Dr G. Prasad was almost in all the universities

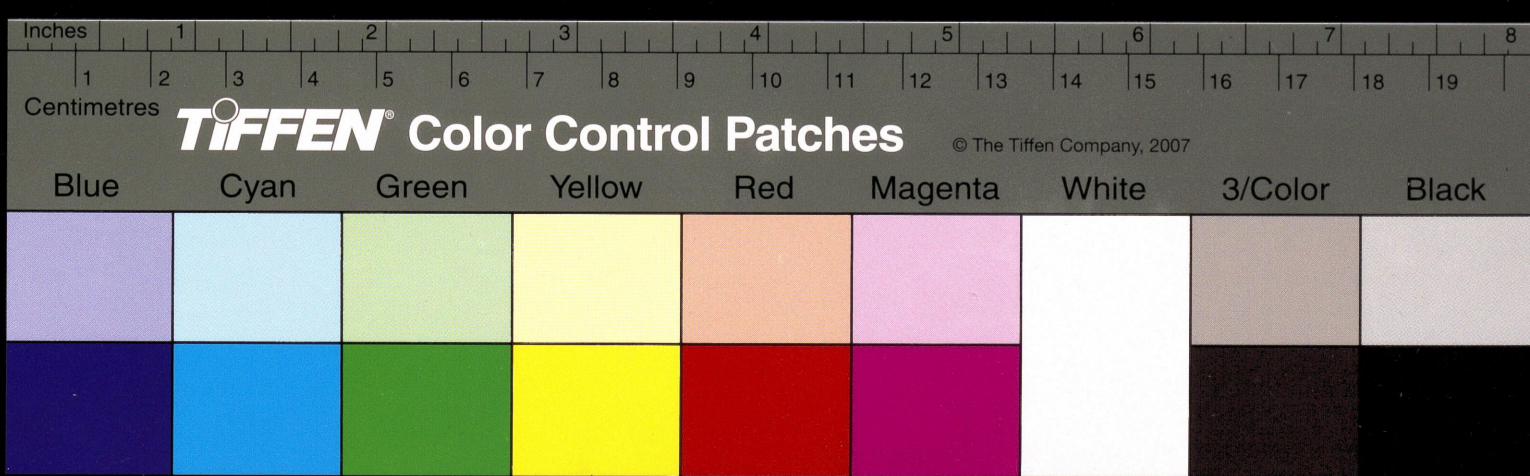

Hence I was not able to learn any thing with

help of Mathematics. I was compelled to take

myself to Hindi Literature to earn some ~~thing~~

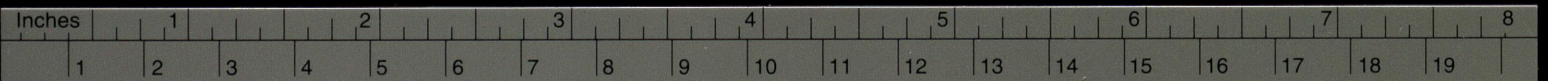

By the way where are Musti-Brothers?
and where is Mr Ayangar?

I wrote about 30 papers in 3 years in L.U.
on different subjects which were published
in different journals of the world. (I saw)
then your ~~part~~ paper in the paper which
which you wrote with Mr. Musti.

in that way. I became very famous in Hindi literature and wrote many books and earned a lot. I wrote an article on Religion and Philosophy in Hindi and the Maharaja of Panna became very glad called me to his palace and proposed to me that I should live at his palace at his own expence. But I refused to live ~~on~~ ^{on} charity and refused his offer. But he was very desirous that I should live in his city. I taught Matric and Intermediate classes and thus remained in his city for about 7 years with great respect till 1936. A new board was started named Rajputana and Central-India board who objected that I was not duly qualified to teach Matric and Intermediate classes. I felt insulted and started at once to Europe and after 12 years came back to Mathematics again. Now I have been appointed as a Research Assistant to Dr A.N. Singh and my duty is to help him in his Research work. I don't teach any classes here. but the post is not a permanent one. I am sorry I can not send any of my reprints, because I have not got them with me. Now I have decided to devote my time to Mathematics. I am doing work now in Hydro-dynamics, cyclo tomography and D. geometry. I will begin to write papers after 6 months. Kindly send all your reprints as soon as possible.

with respectfulness
yours sincerely
Omprakash
