My Dear Sir,

Hope you might have received my humble letter through Swami Innananda of your laboratory. As I have already written to you, I have been asked by the Orissa govt. to organise the x-Ray laboratory of the physics section so that both the teaching work as well as the research work can be undertaken soon after the reopening of the College in July '54. As far as the research section is concerned they are interested in x-Ray applications to Metallurgy in view of the fact that the Iron and steel factory should spring up very soon in Orissa. As you already know, two x-Ray units are at work now in the P. S. O.

Laboratory. We have obtained all the required apparatus in connection with the class work. Fresh grant of about Rs 5000/- is likely to be made for purchase of apparatus for the research section in addition to the usual grant of Rs 3000/- for the X-Ray section of the physics laboratory.

Therefore in my own interest as well as that of the Dept. I would like to go to your laboratory during summer at my own cost so that I might be able to get some suggestions of problems and some advice regarding the apparatus and so on from you or from your assistants of the X-Ray section as desired by you. I will make my own arrangements for staying at well in, if I cannot get any

accommodation near about the
national physical laboratory. I
propose to be there by about the
first week of May and will probably
remain for ~~one or~~ about two months
depending upon the facilities available
in your X-Ray laboratory.

After coming into
some suggestions, I will start doing
to my work here, I also propose to
go to you from time to time
during long holidays.

Hope I might be
favoured with a reply. Trust this
finds you, dear Sir, in the best
health.
I beg to remain, Sir,
yours truly
