

USU

August, 1949

Mr. Shanti Swarup Gupta joined St. Stephen's College after passing his Matriculation Examination of the Delhi Board in 1st Division with third position in order of merit. In the Qualifying Science Examination of Delhi University, he secured 1st Division, standing fourth in order of merit. He studied Mathematics with me for his B.A. (Hons.) Degree (New three years' course) and for his M.A. Degree. He got a 1st Class at his B.A. (Hons.) Examination and again a 1st Class this year at his M.A. Examination. He took up his subsidiary Examination in Physics in which he was declared successful. At his M.A. Examination he offered two special papers - (i) Mathematical Theory of Statistics and (ii) Advanced Astronomy.

The results which Mr. Gupta has shown at the various Examinations speak for themselves. During last five years he came in close contact with me and I can, without hesitation, say that he gave me all satisfaction by his work and behaviour. His knowledge of Mathematics both pure and applied - is sound and extensive. His tutorial work was regular and thorough. He took a great interest in solving problems and in my opinion, he can think intelligently and logically on any problem set to him.

Mr. Gupta was awarded a Scholarship of merit by the University and also Gubbins' Scholarship while he was in the College.

Mr. Shanti Swarup possesses charming manners and an excellent character. I wish him all success in life.
