Dear Dr Joshi,

Our proposal for a Workshop in Statistical Methodology for Ecologists has been sanctioned by the DST and we plan to organize this workshop in the first half of December 1991.

I invite you to work as resource person for this workshop

We ~~have~~ plan to have lectures on theoretical aspects as well as on quantitative analysis along with presentation of case studies. We also

plan to make the participants acquainted with various packages such as Lotus, Minitab etc.

I suggest that you give two lectures on Population Growth Models. We would also like the participants to benefit from your expertise with the computers. If you have some other topic for your lectures than the one suggested here, please feel free to choose it and inform me accordingly.

We also plan to prepare a manual based on the lectures given in the workshop. We plan to get this manual ready, by the time we commence the workshop, for the benefit of the participants. This will give the participants a chance to actively interact with the resource persons by discussing their queries/critical questions with them. I request you to keep this aspect in mind while preparing for your

lectures. If you let us have these notes by 15th September, it would be convenient for further arrangements of making copies and compiling all the material.

We are sure you will extend your co-operation as in the past by actively taking part in this endeavour and by giving your advice and suggestions. We value it and we are looking forward to it. We would like you to stay in Pune at the time of the workshop for as long as possible.

With regards,

Yours sincerely
Akhshikar
