AMBASSADOR OF INDIA

VIENTIANE (LAOS)  
August 30, 1960.

My dear Prof. Krishnan,

Asoka, my son, is a student in the Doon School and will be finishing his Senior Cambridge at the end of the year. He is quite good in his mathematics, physics and other science subjects. He is equally good in arts. He, however, has shown preference for studying physics. He wants to become a physicist, perhaps specialise in modern physics. I should be grateful to know if you could suggest to me two or three best Indian universities where he could get good training in physics.

With kind regards,

Yours sincerely,

  
( P. Ratnam )

Prof. K.S. Krishnan,  
National Physical Laboratory,  
New Delhi.
