

28th December 1989

Dear Krishnaja,

I couldn't write to you since last year. Because I was in the hospital when I got your new year card. It wasn't very important anyway. but I should write to you when I return to house.

I hope you and all family are very well. We are very well too.

How is your work is getting on. Our Radiation Cytogenetic Laboratory are getting very well. I have a colleague who is a biologist working with me. I've been appointed to Head of Radiobiology Department of our Research Center. So, I am a very hard worker since last year. A lot of paper work and including lab. work.

I am still getting in touch with Dr. Lloyd,
We are discussing something about cyto-
genetics problems with letters.

Have you heard anything about the
other friend from courses. I got a news
from Perth, She was in England last
September. Friend of my was there too.
It was a one of IAEA training courses.
Have you attend another course since Tokyo?

Second Radiation Cytogenetic Course
will held in Rio De Janeiro by IAEA.
Are you going there. I hope my colleague
will attend there.

Well, I must close now. Happy
New year and all the best wishes
to you and your family.

Love from Gieri Kotesal,
