In consultation with the author I take pleasure in sending you herewith a reprint of an article that has just appeared in Applied scientific Research. I assume that it will interest you. I seize this opportunity for giving you some information about our journal that covers among other things the special part of science in which you are particularly interested. The cover of the accompanying paper comprises the contents of the issue in which the article in question has appeared. Furthermore I enclose a folder giving some more details about Applied scientific Research as well as a subscription form. Please notice that our journal appears in two Sections A and B.

You would doubtless appreciate having our journal always at hand. I therefore beg you to verify, whether our journal is present in the library you generally use. If this is not the case, will you kindly draw the attention of the librarian to the existence and importance of Applied scientific Research. You serve the interest of science in this way.

Yours sincerely,

(ir H. G. de Winter) Secretary.

APPLIED SCIENTIFIC RESEARCH

REPORT OF THE NATIONAL AND  
GOVERNMENT RESEARCH SERVICE  
FOR THE YEAR 1917  
BY  
W. L. BAKER, DIRECTOR

In connection with the plan to publish a series of reports on the progress of applied science in the United States, it is desired to know what subjects are of interest to the public and to the Government. It is therefore requested that you advise me of the subjects which you think should be included in the series. Your suggestions should be in the form of a list of subjects, with a brief statement of the reasons for their inclusion. The list should be sent to the Director, National and Government Research Service, Washington, D. C.

Yours sincerely,

W. L. Baker

3 February 1955

Dear Dr de Winter,

Thank you very much for sending me reprints of Dr Acharya, which I am glad to have. I may mention incidentally that we have been subscribing regularly for the Journal of Applied Scientific Research since its start.

With kind regards

yours sincerely

Dr H.G. de Winter  
Secretary  
Applied Scientific Research

16 figures. Price - 11 shillings.

This report deals with identification of sources, radio and optical magnitudes, distribution, detection, position determination and angular width of the sources and also with scintillation and refraction.

We shall be glad to know at your early convenience, if you are interested to have the same.

Yours faithfully,

President,  
Indian National Committee for URSI.
