Stockport, England.

May 31, 1954.

Dear Prof. Krishnan,

I hope this finds you and your family in good health. I have followed, with a great interest, the work that you and your colleagues are doing at the National Physical Laboratory.

Perhaps you recall that at your suggestion and recommendation, I went to America Polytechnic Institute of Brooklyn for studies in Chemical Engineering. I spent about 6 years there - 3 years in jobs various phases of the chemical industry and the remaining 3 years in research and some teaching work at the Polytechnic. I am now on my way to India - spending just a short time en route to get myself familiar with the English industry.

I have applied yesterday for a Ch.E. post with the National Research Development Corp. of India and have taken the liberty of giving yourself as a reference. I hope this will meet with your approval.

At the Polytechnic, I have earned a Doctorate. In the industry I have & worked in: formulation of surface coatings; grain distillery; ethylene oxide and synthetic ethanol pilot plant operation and formulation and testing of industrial adhesives and rubber cements.

Looking forward to meet you - with kind regards,

Sincerely yours  
Om P. Kharbande
