Sir K. Krishnan,
National Physical Laboratory of India,
Hillside Road,
New Delhi,
India.

Dear Krishnan,

I enclose a copy of the paper which I mentioned to you during the conference and which I am anxious to have published in some suitable Indian journal.

I would be most grateful for your advice where it should be sent. If you care to communicate it to a suitable journal I shall of course be very pleased. However, I am not at all anxious to get you involved in the controversy and if the journal you suggest is one to which a paper can be sent by the author directly without being a member of an appropriate ~~London~~ society I shall of course be glad to send it directly, if that seems to you a reasonable course.

If that is your advice do not trouble to return the enclosed copy of the paper.

I hope the rest of your trip in Japan was as satisfactory as the beginning and that the delay caused by the typhoon did not disturb the arrangements too much. It was a great pleasure to meet you again in Japan and I hope to meet you soon again in some appropriate part of the globe.

Yours very sincerely,

R. E. Peierls.
