My dear Keshwan

Recently, I have received a letter from
you telling me of your appointment to
the Inspectorship at Allahabad. I warmly
congratulate you on the new appoint-
ment. It is a great pleasure to me
that your ability & powers of concentra-
tion & continued industry are being
recognized in India, & I know also
that you possess the personal character
that will enable you to inspire stu-
dents & to lead an improved Department.
The only anxiety is that you will

continue to have the opportunity to
pursue your scientific inquiries &
to make the contribution to knowledge
which is so possible by your gifts
& training. My hope is that you
succeed in the new post. I will
shall always be interested in pe-
cising any news of the work you
are doing.

For the exercise you must now
feel a part of this terrible war
I must be very concerned about the
position in India. Your problem
is most perplexing. I am sincerely
glad that you are a person who
wishes to give a solution which
will help the people of India
and the world.
