

Residency Dispensary

Jodhpur.

D. 18th Sept '53.

Respected Professor,

I have learnt that an invitation has been extended to you on behalf of the College by the Principal of our college to visit this place. I am hopeful of your coming over to this place, this time, in continuation with your visit to Pilani on the 21st Sept. in connection with the foundation laying ceremony of the Electronics laboratory. Visit to this historic city would prove a relaxation to you for a day or two. It would be possible for us to arrange a programme of sight seeing besides a few engagements in the College.

Upon your advice, I applied to a number of the Universities of the state for an assistantship. I have got a positive reply from Michigan University, Ann Arbor to join a research group working on the cyclotron. I got a cable yesterday confirming the above offer, while am awaiting the detailed letter. If I were to go later, I will go like to go to Calcutta during my Dusshera break to get myself acquainted with the maintenance and work done ^{with} the cyclotron. I would request you to give me an introduction letter addressed to Prof. M.N. Saha and or Dr. B.D. Nag, which can help me in spending

some time at Calcutta in the Institute of Nuclear
Physics.

I earnestly hope you would visit this place
and send me a few lines in reply.

With my kind regards.

Yours obediently
S. N. Purohit
S. N. Purohit.
