Calcutta  
Presidency College

Dear Dr. Krishnan,

It is an age after which I am writing this letter to you. I don't know if you still remember the old days when we met and talked about many interesting things.

I have sent three research schemes under C.S.I.R., (1) on  $\beta$ -emission (theoretical), (2) on Super-sonics (experimental) and (3) X-rays (Experimental). I understand you have an important say in the approval of schemes under C.S.I.R.. I don't know if you will like the schemes proposed by me.

When we were reading in the Post graduate classes, you remember, there

was healthy for only one special paper,  
namely, Spectroscopy. Now, I have been  
able to open Laboratories for special papers,  
(i) Nuclear Physics (ii) Advanced Acoustics  
and (iii) X-rays. So there will be no  
difficulty in ~~starting~~ working for the explicit  
Research Schemes on ~~the~~ Superconductivity and  
X-rays at the Presidency College Laboratory.

You are aware we have started  
a new journal of theoretical physics.  
I hope you will give your unstinted  
support by subscribing for it and by  
sending papers with theoretical back-  
ground, for the Journal.  
Expecting an m.o. of Rs 10 for the journal,  
yours sincerely

K. C. Kar
