

AS THE APPLE FAILED ON SNOW WHITE, THE WITCH NOW MADE **GM!**

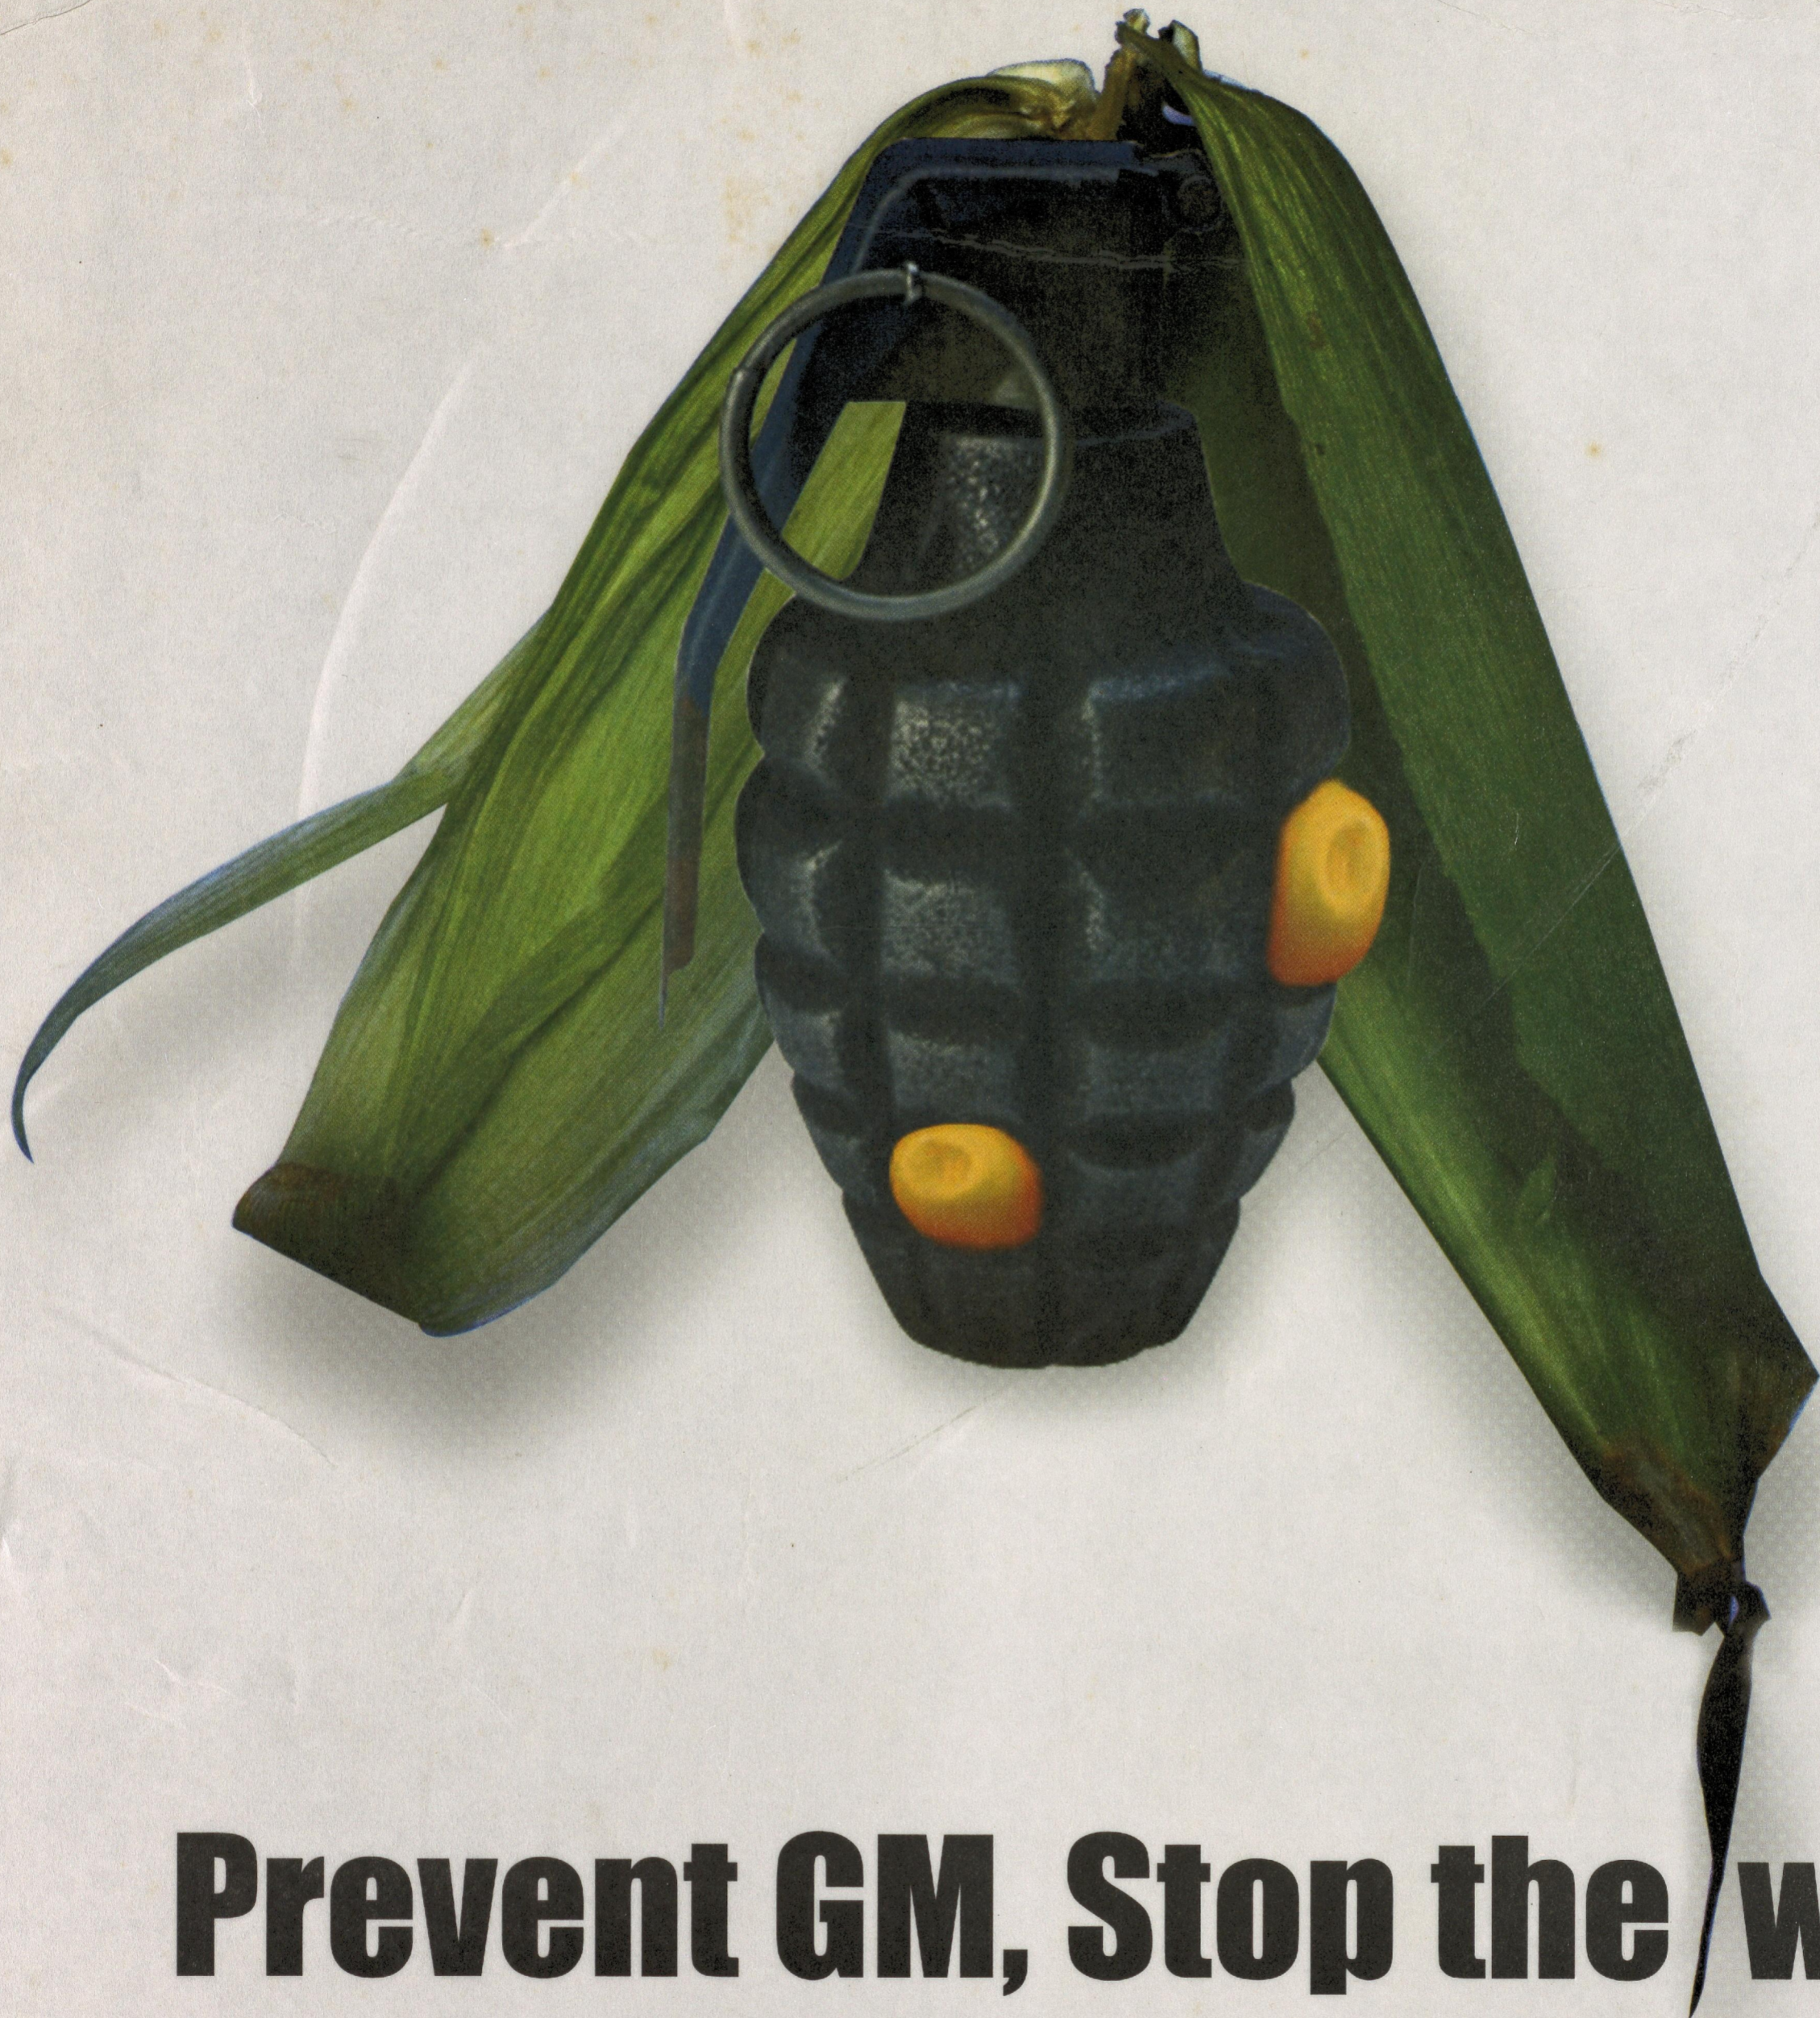

Yes, the GM (Genetically Modified) food is equally poisonous! When these food were tested on rats, they had stunted growth, impaired immune systems, potentially precancerous cell growth in the intestines, infamed kidneys and lung tissue, less developed brain, enlarged livers, pancreases and intestines and higher blood sugar. Even their ofspring were affected, showing that there are even inter-generational effects with GM crops or foods. This harmful, poisonous food would be on your plates soon! Protest before it is late.

**What
can you**

**Know, spread, protest. Send a petition to
the PM through www.iamnolabrat.com**

Your food could be their next weapon!

Prevent GM, Stop the war

The seeds of GM food after grows into plants cannot give seeds that could be used again and these are patented. Hence, the farmers would need to buy the seeds again and again. It has been observed, these plants poison the soil and water around and make the surrounding unft for other crops and organisms. Hence, a time could arise when the environment would support no natural crops but GM and the master of the only growing seeds be the patent-holders. Food would hence be completely under control. If they give us seeds, we would survive, if not we die! How many people can a war capture? This new Bio-war could have every single life captured and controlled!

**What can
you do?**
