

SARDAR PATEL MEMORIAL

Lectures

1957

Broadcast by

ALL INDIA RADIO

New Delhi

December 15, 16 and 17.

This year's Patel Memorial Lecture series, which begins on the anniversary day of Sardar Patel will be delivered by Prof. J. B. S. Haldane, F.R.S. Prof. Haldane has chosen "The Unity and Diversity of Life" as his subject. In the course of the three lectures, Prof. Haldane discusses the application of the concepts of unity and diversity of life not only to plants and animals but also to human life and social

organisations. He analyses some philosophical implications of his views in the context of Indian thought.

Prof. Haldane, the distinguished biologist who has made important contribution to the Science of Genetics, has taught at the Universities of Cambridge and London and has been connected with several learned bodies. He is now associated with the Indian Statistical Institute, Calcutta. His numerous writings include such well-known works as "Animal Biology", "Science & Ethics", "Heredity and Politics", "Science in Peace & War" and "The Biochemistry of Genetics".

All India Radio introduced in 1955 a programme of lectures in memory of Sardar Vallabhbhai Patel who, apart from the great role he played in our Freedom Movement, was free India's first Minister for Information & Broadcasting. An annual feature, these lectures are intended to contribute to the existing knowledge on a given subject and to promote awareness of contemporary problems. Each year, some eminent specialist who has devoted thought and study to any branch of knowledge or public affairs is invited to give through the All India Radio, in a popular manner, the results of his study and experience for the larger benefit of the public. The first lecture on "The Good Administrator" was given by Shri C. Rajagopalachari in 1955 and the second series was broadcast by Dr. K. S. Krishnan, F.R.S. in 1956 on "The New Era of Science".
