Micrographs of tissue made, showing collapse factor in presence of
fresh chlorophyll and fresh chlorophyll in presence of chlorophyll
and in culture

Perchloric acid, HClO₄
(10%)

Perchloric acid, HClO₄
with nitric acid
(10%)

Perchloric acid, HClO₄
(10%)

During acid digestion after the decomposition of the free amino acids and nitrogenous bases, nitrogen is converted to a mixture of perchloric acid and water during free nitric acid or perchloric acid and nitric acid.

Mr. K. Bahadur, B.S.

Bacteriology Dept.
