Dr. K. S. Krishnan,  
3 Kushak Road,  
National Physics Laboratory,  
New Delhi,  
India.

Dear Dr. Krishnan,

I am sending you a copy of a report on the Technical Problems of Arms Control prepared by a group of American scientists under the sponsorship of the Institute for International Order. A number of us in this country who are concerned to do everything we can as intellectuals to forward the cause of international order have set to work to define the kind of research on issues of war and peace which may help to establish some alternatives to present trends.

We want very much to be in touch with scholars and scientists in other countries who might join with us in this effort, and would appreciate very much your letting me know who, among the Indian groups, would be most interested in receiving a copy of our report, and to whom we might send a forthcoming publication on the economic problems of disarmament.

The Preface to the Arms Control report contains a brief statement of the work we are doing, and in the Appendix on pages 28, 29 and 30 there is a brief summary of the areas in which we are working.

I wish that I might have had a chance to see you when I was in Delhi last December, but my time was so short that there was no opportunity to make appropriate arrangements to request an interview.

Yours sincerely,

Harold Taylor, Chairman,  
Committee on Research for Peace
