India

Dear Dr. Swaminathan:

It was good to receive your letter and Annual Report covering the important work that is being done in India by your Foundation. I am happy to grant permission for you to use the name "John and Alice Tyler Center" on your building. I regret, however, that at this time I am unable to provide further support for completion of this building.

Sincerely,

Alice C. Tyler

June 19, 1992

Dear Dr. Swaminathan:

The challenges you describe in your "Dialogue" at the Research and Training Center in April, 1993 are certainly formidable. I am confident, however, that with your guidance these discussions will lead to the "Technology Blending" you have so well described. Our people and planet will benefit enormously from this good work.

I appreciate the honor you plan to bestow on my late husband and me and it is my sincere regret that I will be unable to join you on this auspicious occasion.

With appreciation and best wishes to you and yours,

Sincerely,

Alicia Tyler
