India

January 17, 1989

Dear Mridula:

I am so sorry that I could not write you earlier. I received both yours as well as your father's letters last month. Looking at the CV, I am confident that you should be able to obtain a Research Associate position easily in USA. Unfortunately, we do not have an opening at the present time, however, if becomes one available I will write you immediately. My research interest has been mostly on the physiology and pharmacology of blood platelets. Enclosed is a reprint of my recent article on "Adenosine and Platelet Function" that will give you an idea of our research interest. My friend Dr. Manfred Steiner is working also on platelets but more on molecular aspects (i.e. membrane proteins, protein phosphorylation, microtubules, Con A, monoclonal antibodies to tubulin subunits etc.) that seem to be more related to your work. He is at one of the local hospital associated to Brown University. I will see him next week. We have a meeting together. I will take your CV with me and talk about you. It is possible that he might have a position in his department. You may write to him directly mentioning my reference.

Please convey my regards to your father. I might come to India next summer, and then I will try to see him in Allahabad. If I had a chance to visit Bombay, I will inform you also.

Sincerely yours,

Kailash C. Agarwal, Ph.D.
Associate Professor of
Biochemical Pharmacology

Address for Dr. Steiner
Dr. Manfred Steiner, M.D., Ph.D.
Chief of Haematologic Research
The Memorial Hospital
Pawtucket, RI 02860
