ESG presents
RIGHT TO CLEAN ENVIRONMENT
Second Session of the
ESG Webinar Series on Tackling Air Pollution
Apr 6, 2023, Thu
6pm-8pm
Via Zoom

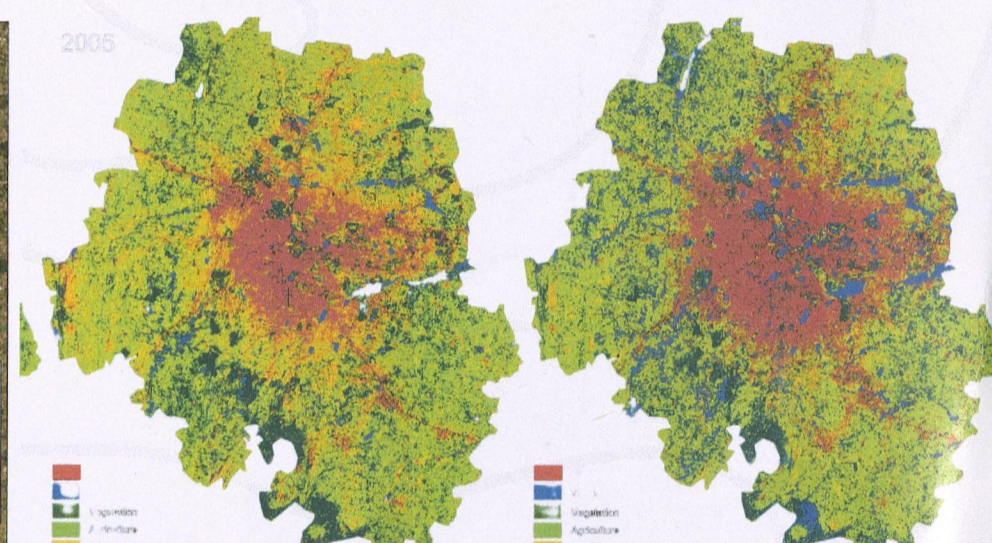

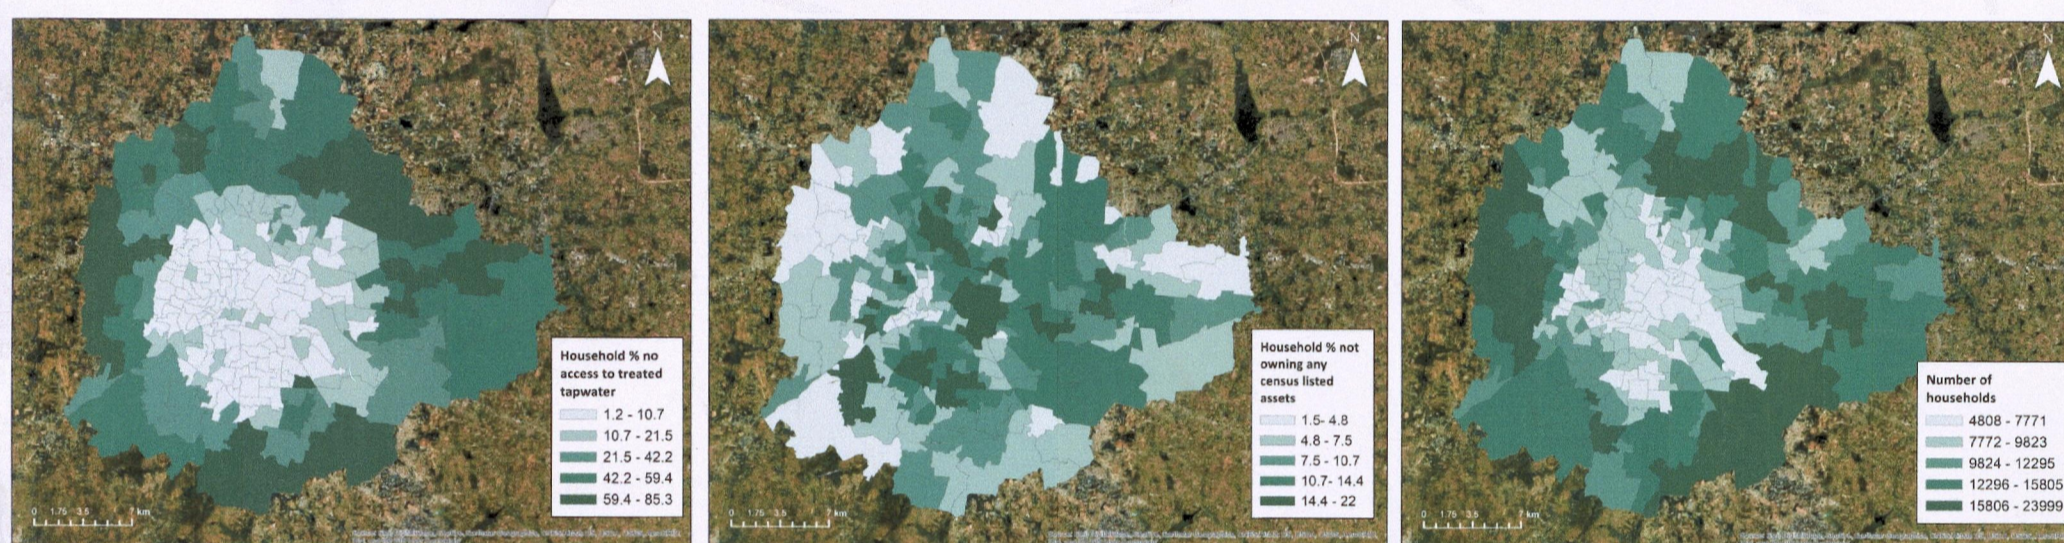

SPEAKERS

- David Boyd
UN Special Rapporteur on Human Rights and the Environment (2008-21),
Professor of Law, University of British Columbia
- Dr. Sarath Guttikunda
Founder, Director
Urban Emissions
- Randeep D
Commissioner,
Health & Family Welfare,
Government of Karnataka
- Chee Yoke Ling
Executive Director,
Third World Network

MODERATORS

- Ms. Bhargavi Rao
Center Fellow, Trócaire, ESJ
- Leo P. Saldanha
Coordinator, Trócaire, ESJ

HOW TO READ LANDSCAPES, AND CREATE MAPS TO REPRESENT, NARRATE AND ADVOCATE PUBLIC INTEREST

ESG workshops on reading and creating maps focus on interpreting available data and generating informative maps employing open access remote sensing information and other freely available data. This enhances narratives relevant to the participants' area of work.

Hands-on technical training is provided using open-source resources such as QGIS mapping software and Google Earth Engine platform to visualise and analyse data. Policy and data analysts, landscape designers, activists, lawyers, farmers, students, etc. benefit immensely from this learning.

HOW TO PROTECT LAKES AND RAJA KALUVES

Relying on extensive field experience studying socio-political and ecological dimensions of lakes, kaluves (canals) and such other wetlands, and securing pathbreaking judgments instituting ground up strategies advancing 'wise use', protection, conservation and rehabilitation of water and such other commons, ESG regularly conducts capacity building programmes and workshops for communities at local, taluk, district and state levels.
