

Confidential.  
DEPARTMENT OF SPACE

12/3/83.

G. P. Rajan.

I have seen a report which states that V.P. Kodali (formerly of Dept of Electronics, now with DRDO) was "responsible for the design, fabrication & Commissioning of a precision tracking Radar for ISRO..."

As far as I know this is not true. The Project was under the direction of Aravamudan with an ISRO + a TIR team doing bits + pieces... Do you know the facts. Kodali was at TIR under Sentharam + may have some work in the project.
