Subject: Films of Arid Zone Interest

Dear Sir,

The Secretariat of Unesco is considering the possibility of producing, during 1954, a documentary film on the arid zones. It has been suggested that the film should indicate the main problems, and then outline what is being done by the international agencies and by national and local organizations to solve the problems through scientific research.

Before planning the film it would be extremely helpful to us to have information on films which have already been made on different aspects of arid zone research. We should be most grateful if you would give us information about any such films the existence of which you may know. Ideally the information should include the following details: Title; Producer (name and address); Size (16 or 35 mm.); Colour or black and white; Length; Short synopsis. But any information that would enable us to identify the film and obtain full details would be most helpful.

Yours faithfully,

*J. Swarbrick*
