

Govt College Lahore.

30.4.34

My dear Dr. Krishnan,

Very many thanks for your letter of the 26<sup>th</sup> which I was glad to have yesterday — it recalled so vividly the pleasant time we were able to have at Nagpur due mainly to you. Was interested to read about Dr. Janson's vacation with you. Do please remember me to him. I wonder if & when we shall meet again & repeat the jolly time of Nagpur (if not this paper setting).

Of the two men in the world he Physics Dept of the University that we want here, I should like one ~~person~~ to be an experimentalist while the other a mathematical man capable of teaching Mathematics (besides Physics) to our men. The experimentalist I should like to

And our own products who will  
have in view of whom I would like to have is one of  
our own products who will be exceedingly helpful  
useful in the lab. ~~I don't~~ The mathematician  
will have to be selected out of the applicants. I wish  
I had made this fact clear that one of the two will be  
a mathematician. Maybe that since the ad. was  
not quite clear, ~~some~~ suitable man may have applied, in  
which case ad. for the 2<sup>d</sup> post will have to be put in  
again.

If your friend Dr. Svecar is a mathematical  
man I should certainly like him to apply. If not if  
you know any other mathematical physicist perhaps you  
would be good enough to persuade him to apply. The posts  
are not very high paid, initial salary being 200 of the  
frank I expect will be fixed at 350/- with 15% annual  
increment.

Hope to hear from you & with all good wishes,

Yours  
Sincerely

J. B. Sells
