11 JUL 1953

Dear Sir,

I don't believe you know me but I would be obliged indeed if you will kindly help me out in this matter. I am at present studying for a degree in Aeronautics at Glasgow University, and the degree has a special bias on the aerodynamic side of the subject. What I would like to know is this. Is there any department of Fluid Mechanics and Aerodynamics in the N.P.L.? If not, is there going to be any established in the forseeable future and what would be the prospects of an aerodynamicist in the NPL in general in say two to three years from now?

As these pieces of information are vital for my career and as I have no clear knowledge of the National Physical Laboratory in Delhi I have taken the liberty of addressing this letter to you in the hope that you will enlighten me as regards these points.

I know this encroaches on your very vital time, I shall still hope to receive a reply from you at your earliest possible convenience.

Thanking you in anticipation.

I remain,
Yours truly,
A. Das Gupta.

P.S. I may mention here that though I haven't met you in person I have often heard of you from my father, P.C. Das Gupta, with whom I gather you have played bridge on many an occasion in New Delhi.
