To,

Sir K. S. Krishnan. D.Sc. F.R.S.
Director, National-Physical-Laboratory.
New-Delhi.

Sir,

I am engaged in research work on "Fluorescence in crystals" in the Physics department of this University. For the same, I need to prepare single-large crystals of certain organic compounds like pyrene, phenanthrene Anthracene & durene etc. I have tried a number of methods for this but with no fruitful results.

I shall be highly obliged to you if you will kindly suggest some practicable and sure method to prepare single crystals of these compounds large enough for the fluorescence-studies. I again request you to very kindly help me in this connection as it is a stumbling-block in the progress of my work.

Thanking you,

Yours sincerely

Hari Mohan
