

D.O.No. 216(A)

27/9

EDUCATION DEPARTMENT
WEST BENGAL SECRETARIAT

Calcutta,
24th September 1948.

Dear Dr. Krishnan,

May I take the liberty of addressing you about one of my old pupils, Dr. Bhagawati Charan Guha ? You are doubtless aware of the work that he has been doing, and though I have no expert knowledge on the subject, I have received most enthusiastic reports on his work as an experimenter. He has been rotting in the Subordinate Educational Service of this Government on a meagre salary, and I do not see any immediate prospect of his getting any higher post as none are likely to fall vacant in the immediate future. I think you might find him very useful, and it seems wasteful to utilise a good experimental scientist of his calibre in teaching junior students in our college. If you could absorb him in the National Physics Laboratory, I should be more than grateful. I do not think you will find him unequal to the task that you may set him to do.

Is there any chance of your coming to Calcutta in the near future ? I had only a passing glimpse of you when you were last here.

With kindest regards,

I am,

Yours sincerely,

A.K. Chanda
(A.K. CHANDA,
Additional Secretary.)

Sir K.S. Krishnan, D.Sc., F.R.S.,
Director, National Physics Laboratory,
University Buildings, DELHI.
