18 AUG 1958

7 Humayun Road,
New Delhi - 1,
August 15, 1958

Dear Dr. Krishnan.

Please accept my very hearty congratulations on your appointment, announced this morning, as National Professor. It is, I think, the highest distinction to which a scientist can aspire in this Country. There are a few occasions in which friends as well as the recipient of the honour can equally share the joy, and this is one of them...

Yours sincerely
C. V. Raman

Dr. K. S. Krishnan, F.R.S.,
Director, National Physical Laboratory
New Delhi

Prof. C. Mahadevan, M.A., D.Sc.,
F.A.Sc., M.A.I.M.E., F.N.I.,
HEAD OF THE DEPARTMENTS OF GEOLOGY & GEOPHYSICS
PRINCIPAL, A. U. COLLEGES AND
INVESTIGATOR-IN-CHARGE OF CSIR SCHEMES.

ANDHRA UNIVERSITY
WALTAIR

Date 15th August '58.

My dear Prof.Krishnan,

I was happy to see the award of National Professorships to you and to Prof.S.N.Bose. This was, of course, expected. May you live long to enjoy it, and to continue to give the lead in Scientific Research.

If you are coming to Waltair for N.I.S. meeting, I need hardly say our home is yours.

I hope you are all keeping fit and fine.

With my namaskars,

Yours affectionately,

C. Mahadevan

Prof.Sir.K.S.Krishnan, F.R.S.,
National Professor of Physics,
National Physical Labarotaries,
3,Khushak Road,
NEW DELHI.

Ref. No. EC.48

Dated 16th August 1958

Dear Sir Krishnan,

In the Hindu of 15th August, I was delighted to read that the President has appointed you a National Professor. This is a worthy recognition by the Country and the Government of your eminence as a scientist and a proof of the regard and esteem in which you are held by all those who have the privilege of knowing you.

Please accept my warmest felicitations on this honour by the President and my best wishes that you may be blessed with many years of most happy and fruitful life.

Mr.Baliga tells methat there will be a meeting of the Board of Directors of the Bharat Electronics Ltd., on 27th August. I presume that you will attend it; you will be cordially welcome at our place as ever and if you will please let me know the date and time of your arrival, I shall arrange to meet you when you arrive.

With renewed felicitations and best regards,

Yours sincerely,

K. Sreenivasan

VICE CHANCELLOR

18 AUG 1958

No. 2541 /VC

DELHI 8,

August 16,1958.

My dear Dr.Krishnan,

This is in continuation and confirmation of the conversation I had with you yesterday at Rashtrapati Bhavan at the Vice-President's party.

I am writing this to confirm the statement that I made to you orally, viz. that the University of Delhi will feel itself honoured if, in your new capacity as National Professor, you would choose to make use of the facilities of this University. We shall be very happy if you can bring your experience, knowledge, enthusiasm and inspiration to help our students of Science in this University. I am also confident that the teachers of Science in this University will also deem it a privilege to have you give them a guiding hand in their work.

Thanking you,

Yours sincerely,

(V.K.R.V.RAO)

Dear Dr.Krishnan,

25 AUG 1958

It is my great pleasure to reproduce for your information the following resolution passed by the Executive Committee at a meeting held on the 16th August, 1958, under the Chairmanship of Dr.D.M.Bose:-

"The Executive Committee of the Indian Science Congress Association cordially appreciates the policy of the Government of India in instituting National Professorships, as it is a definite step forward in stimulating the urge for scientific research in the country, and notes with pleasure that both the immediate recipients of this national honour, viz, Prof.S.N.Bose and Dr.K.S.Krishnan are long standing Members and distinguished Past Presidents of the Indian Science Congress Association. It also recalls with particular gratification that the first National Professorship too, created as early as February, 1949, was bestowed on one of its Honorary Members and distinguished Past Presidents, Dr.C.V.Raman."

With kindest regards,

Yours sincerely,

(A.K.Dey)

Respected Professor Sahib,

I am extremely glad to see the announcement in the paper that you & Mrs. Bose have been appointed National Professors on 15th. These exalted recognitions ought to have been conferred on your people long ago. Anyway, though belated, your's talent & Scientific aptitude have ultimately been rewarded with. May God bless you with more of life so that our future generation may learn some thing from persons like You whom the world has recognised ere long. Perhaps you may not recollect me, though I used to visit your place

Dear Sir,

May I convey to you our sincere and heartfelt felicitations on the Independence Day honor conferred on you? We felt a thrill of pride that one of us from the far South who has gained worldwide recognition in the realm of science has rightly been hailed the National Professor on the occasion of the 11th Independence Day celebrations. It is so much more an honor to the people of Bharat & the Tamil Nad in particular than to you — who has & could hold your own by dint of your own magnificent achievements.

We fervently pray to God Almighty to endow you with many more years of good health, vigor and fruitful service in the cause of Humanity & Science & the glory of Bharat. Jai Hind,

Sincerely yours
O. A. Narayanaswami

My dear Dr. Krishnan

Please permit me to congratulate you wholeheartedly on your appointment to one of the two National Professorships created by our Government In conferring this honour on you the Government has honoured itself. You are an outstanding figure among the scientists and your reputation is world-wide. There could be no better choice than you. The National Physical Laboratories will no doubt lose your able and expert guidance at any rate in a direct way, but the loss to the Laboratories will be much more than made up by the gain to the country. May God grant you long life to serve your science & bring glory to the country.

With best regards

Yours sincerely

16-8-58.

My dear Krishna Iyengar.

I am extremely happy to learn from yesterday's "Hindu" that the rare honour of National Professorship has been conferred on you. It is a rare honour and a worthy recognition of your eminence in the field of Science. I pray God to crown ~~with~~ you with still greater honours and to bless you with a long and healthy life of useful service to our motherland and to the world.

I was in due receipt of your earlier letter of the 18th January to which I have not sent a reply. As my desire to have a photograph of yours, I am not very keen about having one of enlarged size, though that would certainly be quite welcome. I shall be satisfied with getting a small size photograph which I can get enlarged here. But I leave it to your convenience. Regarding the dress, I may frankly say that I prefer a photograph with long coat and turban to one in English dress. You may send me any one of any size according to your convenience and I shall most thankfully accept the same.

I would also request you to let me know in advance if possible when you next go to Alwaye or any other place near about my village so that I can try to meet you. My son in law Gopinathy — husband of my fourth daughter is a Senior lecturer in automobile Engineering in the Govt Polytechnique at Kalamaserry near Alwaye and is staying at Kamath buildings Alwaye. Do inform him your best wishes and regards.

Namaskarams — yours very sincerely
Wish you a happy Tamil New year. A.K. Kannoth

Molviganj,
Lucknow.
18-8-58.

Respected Professor Sahab,

I feel proud to send my hearty congratulations to you for being honoured as the National Professor on the occasion of 15th August, 1958.

'Lives of great men all remind us,
We should make our lives sublime,
And departing, leave behind us,
Foot-prints on the sand of time.'

Permit me sir to put the following few lines in your honour.

I have an intense and keen desire to become a great scientist.

I am an M. Sc. (Physics) Second division from Lucknow University and have also passed Proficiency examinations in French and Russian languages.

Due to financial troubles, I could not continue my higher studies and had to serve as Lecturer in Physics for about five years in a College at Lucknow, and I am at present in Govt. Service as Social Education Organiser under the Community Development Scheme, but I ~~am~~ feel discontented

here since my bent of mind is towards Scientific work. I therefore with folded hands request you kindly to let me serve in the National Physical Laboratory or allow me to work as a Research Assistant in some Scheme under your kind guidance so that my ambition of making the best use of my knowledge of Physics may be satisfied.

Hoping for a kind and favourable reply.

I am,

Yours Obediently,

Sheo Kumar,

DEPARTMENT OF PHYSICS
UNIVERSITY OF GORAKHPUR
GORAKHPUR

August 21, 1958.

Respected Professor Saheb,

Please accept my congratulations on your appointment as National Professor, an honour which you have so well deserved.

I came to Gorakhpur on May 2 and have been here ever since, ~~then~~ organising the Department and setting up the laboratories. Regular classes started in July and we have about 14 students in M.Sc. Prev. and 60 students in B.Sc. Part I (Phys. group). We have got most of the equipment available in India, but there is difficulty in imports,

specially about Spectroscopic apparatus.

Last year I had requested you if it would be possible to get ~~multiple reflection~~ for long path mirrors for multiple reflection unit prepared at the N.P.L., and you wrote that it would be possible by the end of the year. If it can be done now I may send the details.

I hope this finds you in perfect health now. I am looking forward to the next Science Congress Session at Delhi for the honour of meeting you. I wonder if you can snatch a day out of your busy time to visit this new University whenever it is convenient to you.

With best respects and kindest regards,

Yours sincerely,
D. Sharma

18th August, 1958

Dear Doctor,

Although I am sure you will be receiving congratulations from many highly placed friends and well-wishers of yours on your being elated to National Professorship, a rare honour given probably only two more in India, I would like to add that I will be failing in my duty if I do not express to you at least in writing the immense happiness I and my wife felt when we read the announcement three days back followed by a photo of yours in the Hindu of yesterday.

Does it mean that you will be leaving the National Laboratories, Delhi, and take up pure research work at some convenient place as Dr. Raman has done? Please accept our congratulations and best wishes.

I trust that you are doing well.

Yours sincerely,

(S.Krishnaswamy)

P.S. It was only last week I received a surprising letter from some gentleman from Tirumalgari, a suburb of Secunderabad - a card and he writes as follows:

"தமிழ்காரம். தங்கத்தின் இரண்டாம்தான் நிகழ்ச்சியில் பங்குகொள்ளும் பேறுபடைத்த பலரில் நானும் ஒருவன். இந்நாளை மறக்கமுடியாது. கிருஷ்ணன் அவர்களின் வாய்மொழியை நாளைவரைக் கேட்கும்படி செய்விக்கும் தங்களுக்கு என் வாழ்த்துக்களை கூறக்கடமைப்பட்டுள்ளேன். தாங்களது முயற்சி தொடர்ந்து ஊக்கமாக."

தங்கள் அன்புள்ள,
தி. சா. நாதன்."

Dr.
A. Gopalakrishnan

15 SEP 1958

National Chemical
Laboratory, Poona-8
12/9/58

My dear Professor Krishnan

I congratulate you on being appointed as a National Professor. By this Govt. of India has not only recognised your immense contribution and great leadership in the field of Science, but has given a special status to science as a whole.

I still pleasantly remember the period I was with you in N.P.L and your favour, kindness and help but for which it would have been difficult for me to continue there.

During that time you once remarked to me that a period of five years is enough for a keen worker to establish himself. I have tried the intervening period to establish a school on electron diffraction here, built diffraction cameras and high tension sets also. Two of my boys have already been awarded

Ph-D degrees for their work on electron diffraction, under my guidance.

For further training especially in the recent development on electron diffraction, I have been recommended for C.S.I.R.O. to go to Australia, to work with the Cowley group in Melbourne, under Colombo Plan. I do not know whether I have been able to establish myself, but it is for you to judge.

I feel that my training and experience in the field of electron diffraction and microscopy may also be useful in your laboratory. I would like to work with you again, if suitable opportunity (A.D. or similar such post) is given. It will be a great honour to work with you again.

With Kindest regards
Yours sincerely
Amil Gosavi

Revered Dr. Krishnan,

Kindly accept my sincere felecitations to you on your appointment to the National Professorship I felt extremely glad when I heard the news. May Lord Srinivasa bless you with a very long life, all happiness and prosperity. I have not been well during the past one month. Hence the delay in writing this letter. I have taken leave for three months from the commencement of this academic year. I am due to rejoin duty on 18th October after the Autumn vacation. I have to continue working at Delhi as I cannot get a Lecturers post here without the M.Sc degree. I must complete my work and get my M.Sc as soon as possible. I am sure that

with your very kind help and guidance I would be able to do so.

Trusting this finds you in excellent health, cheer & with kind regards to your good self and family

Yours Sincerely,

Kedarath.

My dear Dr Krishnan,

My warmest felicitations on the National honour of the Special Professorship.

I earnestly hope it is an augury of the highest ~~International~~ honour also in the immediate future, - which too will only be a formal recognition of a fact outstanding for some decades.

I trust all of you are well, and you are in the best of health.

Are you likely to come this side for any work?

With warmest regards,

Yours sincerely

P. Narasimhaiya

August 15, 1958

Respected Sir,

I was very happy to learn today that you have been honoured by the Government and have been made the National Professor.

On this occasion I hasten to offer my respectful congratulations to you. I am proud of being one of your students.

With best regards,

Yours Sincerely,

Krishnaji

Sir K. S. Krishnan
F.R.S.
National Professor.

Dr.B.P.Pal,
MSc,PhD(Cantab),FLS,FBS,FNI,
Director,

INDIAN AGRICULTURAL RESEARCH INSTITUTE,
New Delhi.

20 AUG 1958

Dated the 19th August,1958.

My dear Dr. Krishnan,

Please accept my heartiest congratulations on your becoming National Professor. This is a high honour which you have very richly deserved.

I am sorry I could not write earlier, as I had been laid up with bad throat and fever.

With kindest personal regards,

Yours sincerely,

B.P.Pal

(B.P.Pal)

Dr. Sir K.S. Krishnan,F.R.S.,

Dear Sir,

Kindly accept my heartiest Congratulations on your appointment as National Professor.

Let me introduce myself as one who worked under Prof. Bhagavantam in the Andhra University and took D.Sc. by doing research on some intensity problems in Raman Effect. Later I had been to U.K. and U.S.A on Govt. overseas scholarship scheme and had training in Geophysics for two years. After my return from abroad, I worked for nearly three years in the Govt. of Madras as special Officer for the Groundwater resources doing Geophysical Survey to locate good sources for groundwater. At the time of partition of Madras State, as

there was not much encouragement to the type of job I was doing, I resigned that job and joined here. Since 1954 I have been here as Head of the Department of physics. After my joining here, I revived the research in plasma which was not being done since Prof. S.R. Rao left in 1944, and I am able to train 4 Ph.D's and published about 30 research papers during this four years' period. Sir, I have been doing my best here and inspite of the considerable amount of research output in this comparatively short period, I find here no appreciation of my work. The main stigma being that I am a Brahmin. I have been appointed here by DR. C.P. Ramaswami Ayr. I am now getting a salary of Rs. 900/- in the U.S.I. scale. Still, I would like to leave this place at the earliest possible convenience and enter into Govt. of India service where there is no caste prejudice etc. properly the applications. Recently four posts of Asst. Directors of Scientific Research advertised. I request you, sir, to kindly remember my name whenever a suitable opportunity arises, and help me to your best possible extent.

Thanking you, with best regards, yours sincerely

K. Venkateswarlu.

for the award of the College Diploma (D.I.C) in Electrical Engineering. I expect to finish my work for these two Diplomas by July 59.

I am eagerly looking forward to the days of my association under you once again.

With warmest regards,

yours faithfully

R.A. Padmanabham.

28/8/58.

Dear Dr. Krishnan,

I am extremely delighted to hear the announcement of your appointment as a National Professor. I most humbly wish to convey you my Compliments and Congratulations on this unique distinction. I sincerely pray God to give you enough strength to serve the ~~to~~ Cause of Science & our Country for years to come.

I am Carrying on my studies well in the Ultrasonics Laboratory under the direction of one Dr. J. Lamb of Imp. College. I am now studying the Ultrasonic Relaxation in Organic liquids & its effect on molecular structure. I am registered here as an internal student of the University of London for Msc (Physics) by research; and in the College as a Post graduate student

Dr K.S. Krishnan, F.R.S.
National Professor and Director
National Physical Laboratory, NEW DELHI.

Dear Dr Krishnan,

Kindly accept my hearty congratulations on the sig-nal Honour conferred on you today. I seek a favour of you.

My second son Dhanvada Madhava Rao, after getting the B.Sc of this University in 1950, left for England and obtained the Diploma of the Imperial College, London in Aeronautical Engineering in 1953. Immediately thereafter he worked in the Design office of De Havil-land Aircraft Co till May 1955 when he was appointed Lecturer in the Indian Institute of Science, Bangalore where he is now working.

He is not unknown to you. You were kind enough to be present at his Upanayanam ceremony here on 2-6-1949. Later on after he com-pleted his course, I called on you at the N.P.L on 9-2-1954 to seek your valuable advice about his future and you were kind enough to make certain suggestions.

He now wishes to apply for the post of Senior Technical Officer in the Directorate of Technical Development and Production, Air, Govt of India in the Rs 600-Rs1150 grade for which he is fully qua-lified. I shall be very grateful if you will kindly permit him to name you as one of his referees. I am confident that you will grant me this favour and inform me at your very early convenience.

With my respectful regards and trusting this finds you and your family in excellent health.

Yours sincerely,

D H Rao

(D.H.R.Rao.)

Sir K.S.Krishnan,F.R.S.
Director,National Physical Laboratory,
Hill Side Road,New Delhi.

Dear Sir,

Please allow me to congratulate you on your appointment as National Research Professor,an honour which you rightly deserved. I enclose herewith a research note for your perusal.

As you know I retired from the services of Allahabad University on attaining the age of 62 years. As,however,I am in good health and as I do not desire to live an inactive life I have decided to serve a suitable institution either on an honarary or on a contract basis. In this connection ,since I am so wellknown to you,I should like to mention your name as a referee in case a necessity for this arises. I shall feel grateful if you will kindly agree to this.A very early consent for this is requested.

Wishing you the best of health and with regards,

I remain
Yours sincerely,
G.B.Deodhar
(G.B.Deodhar).

X-Ray L_{III}-Absorption Edges of Gold and Platinum in Some Complexes

As a result of his extensive investigations, STELLING[1]) has shown long ago that the K-edge of chlorine in a complex compound is dependent on the heavier central atom to which it is more closely bound. The other aspect of the phenomenon is the influence of the neighbouring light atoms on the absorption edges of the central heavy atom. With a view to

Table 1. *Wavelengths of L_{III} Edges of Au and Pt*

	Compound	(X. U.)	ν/R	$\Delta\nu/R$	eV
Au L_{III} edge	Gold Metal	1037·85	878·04	0 00	0·0
	$HAuCl_4$	1037·70	878·17	+ 0·13	+ 1·7
	$NaAuCl_4$	1038·96	877.10	− 0·94	− 12·7
	$(NH_4)AuCl_4$	1038·59	877·42	− 0·62	− 8·4
	$KAuCl_4$	1039·24	876·87	− 1·17	− 15·9
	$KAuBr_4$	1038·20	877·74	− 0·30	− 4·1
	$KAuI_4$	1038·26	877·69	− 0·35	− 4·8
	Au_2O_3	1037·99	877·92	− 0·12	− 1·6
	Black Sulphide	1037·92	877·98	− 0·06	− 0·8
Pt L_{III} edge	Platinum Metal	1070·20	851·49	0·00	0·0
	$MgPt(CN)_6$	1070·73	851·08	− 0·41	− 4·57
	$K_2Pt(CN)_6$	1071·87	850·17	− 1·32	− 17·9
	K_2PtCl_4	1070·30	851·42	− 0·07	− 0·9
	$(NH_4)_2PtCl_4$	1070·80	851·01	− 0·48	− 6·5
	Na_2PtBr_6	1070·82	851·01	− 0·48	− 6·5
	Na_2PtCl_6	1070·85	850·98	− 0·51	− 6·9
	$(NH_4)_2PtCl_6$	1070·96	850·89	− 0·60	− 7·2
	K_2PtCl_6	1071·45	850·51	− 0·98	− 13·3

Conversion factors: $\nu/R = 911\,273/\lambda$ (X.U.) and $1\ \nu/R = 13{\cdot}575$ eV.

study this aspect, investigations on the L_{III}-absorption edges of gold and platinum in various complexes were undertaken.

All the complexes were taken in solid form and their optimum amounts to be used in suitably prepared absorbing screens were determined by trial. The source of X-Rays was a Machlett molybdenum tube, operated at 35 kV and 9 mA. The spectrograms were obtained with a plane crystal spectrograph made by Messrs ADAM HILGER giving a dispersion of 12 X.U./mm. with calcite as a dispersing crystal. For measuring the wavelengths of the absorption edges of gold, the

fluorescent K_α-lines of Rb (37) λ 923·64 X.U. and λ 927·76 X.U. and the L_γ-emission lines of W (74) λ 1096·31 X.U. and λ 1059·80 X.U. were used. The fluorescent lines of rubidium were excited by keeping a screen of rubidium sulphate in front of the window of the X-Ray tube. The L_γ-emission lines of tungsten arose out of a deposit of this metal on the molybdenum target from the filament of the tube. For measuring the absorption edges of platinum $WL_{\gamma 1,2,3}$ emission lines (λ 1096·31, λ 1065·89, λ 1059·80 X.U.) were chosen. A Siegbahn type of instrument was used in microphotometering the spectrograms. The Table 1 represents the results obtained.

STELLING's experiments on the complex compounds containing chlorine showed that the influence of the central atom in a complex is to shift the wavelength of the Cl-K edge towards the *higher* frequency side with respect to the edge in gaseous chlorine. It is interesting to note from the above table that in contrast to this observation, the present work of the authors on gold and platinum complexes shows that the neighbouring atoms have a tendency to shift the wavelength of the L_{III} edge of the central atom towards the *lower* frequency side with respect to the edge in pure metals. However, four compounds viz. $NaAuCl_4$, $KAuCl_4$, $K_2Pt(CN)_6$ and K_2PtCl_2 show rather large shifts. In K_2PtCl_6 the L_{III} edge of platinum shifts by 13·3 eV towards low frequency side; on the other hand the Cl-K edge in the same compound, according to STELLING shifts by nearly 8 eV towards the high frequency side i.e. in the opposite direction.

The authors offer their hearty thanks to Dr. R. S. VERMA of the Defence Science Laboratory, New Delhi, for providing the facilities regarding the microphotometer work and to Dr. A. K. ROY for his assistance in microphotometering the spectrograms.

Respected Sir,

Though stranger, I seek your kind leave to offer my sincere congratulations and felcitations on your appointment as National Professor on the Independence day. The Union Government must be congratulated for it . It is a signal honour in recognition of your valuable services as eminent scientist of wide fame. Our country is proud to possess such distinguished persons. I have had the privelege of seeing your esteemed self, recently, in your Bangalow in company with my son-in-law Mr. T.R. Ramasamy.(Mr. Achalu Iyengar's brotherinlaw) in May 1958. Further than that, my friend Mr. S.A. Chariar M.Sc. has been paying high - tributes to your eminent qualities. Personally I am also indebted to you as the present position of my son T.S. Rajagopalan as documentation officer (Junior) is due to your kind support. Therefore I am, purforce, tempted to write this letter . Kindly pardon me for the liberty. I pray that God may bless you with long, happy and healthy life for many more years to come so that your services as a great scientist may be utilised for the further scientific advancement of our country.

Yours sincerely,

R. Srinivasarangan

Sir K. S. Krishnan F.R.S.
National professor for India.

My Dear Sir,

Please accept my hearty congratulations on your assuming the National professorship of India. Perhaps you may recollect that I was one of your students from Allahabad in 1947. I am over and then Taking the pleasure privilege of writing to you.

At present I am working for my Doctorate in the small angle scattering of x-Rays under Prof. Kratky. He is one of the few investigators in this field perhaps you know. His small angle scattering apparatus has found a place in the World exhibition at Brussels this year. I am busy in determining the shape of Copper sulphate particles, by x-ray.

Hope this finds you, Sir,

With best of wishes.

Yours Sincerely

Trivedi Rama

Dear Dr. Krishnan,

I am happy to learn that you have been designated the National Professor of Physics. Please accept my heartiest congratulations on this national honour conferred upon you.

I wish you long life and sound health to be of service to the nation.

With kindest regards,

Yours sincerely,

N. R. Tawde

RESOLVED that congratulations letters may be sent to Dr.K.S. Krishnan, Director National Physical Laboratory and Dr.S.N.Bose, Vice Chancellor Vishwa Bharati University on their appointment as National Professors of India.

To

Dr.S.N.Bose,
ViceChancellor,
Vishwa Bharati University,
Shantiniketan, W.B.

Dear Sir,

We saw the news of your appointment as a National Professor of India in the Daily Papers. It pleased us beyond limit that Government of India has recognised your merit in such a distinguished way. Please accpet our hearty congratulations for the same.

We have organised an "AMATEUR SCIENTISTS CLUB" in the College, which is being divided into six different associations, namely Radio Club, Photographic Club, Industrial Chemistry Club, Mathematics, Botany and Zoology Clubs.

Our humble motto being to give practical training to the students which is missing in our college education. We seek your kind support and blessings for the same.

Once more we congratulate you and Pray the Almighty to help you in carrying out your responsibilities.

Dear Dr Krishnan,

Heartiest congratulations from all of us on your appointment as National Professor. On behalf of the academic council I extend to you our cordial invitation to make the Institute your place for work and express the hope that you will honour us by your association. You are aware of the facilities that we have. I have no doubt that if you are inclined to consider favourably the proposal, the academic council will be only glad to move the Board of Governors for providing such additional facilities as you may require to make the Institute your home and place of work for the next five years. An early favourable reply will be very greatly appreciated.

With kindest regards and good wishes,

I remain

Yours sincerely,

S.R. Sen Gupta

Dear Sir,

Let me congratulate you heartily on your appointment as National Professor of Science, which you richly deserve by your scholarship, leadership and above all, the real modesty, rare among well placed intellectuals.

Sincerely yours,

V. I. Subramoniam

August 21st 1958.

My dear and esteemed Sir,

I hope you remember me as younger brother of Mr. Iswara Dutt. I was transferred here in March 1956 and I have been here ever since. Henc I had not the privilege of meeting you recently.

I am now writing to you to offer you my heartiest felicitations, though belated, on your being made a National Professor. It is a great honour and you very richly deserve it. Need I say how delighted and happy I was when I saw the news. It is an honour both to you and to the Govt. itself. May you achieve yet greater honours.

With best regards,

Yours sincerely,

K. Ananda Mohan

26.4.1961.

My dear Krishnan,

Prof. K.Mothes, President, Deutsche Akademie Der Wissenschaften Zu Berlin, Halle (Saale), den, Am Kirchtor 1, Germany, had written to me to send some of my students to work on the radio-isotopic technique and its application to plant physiological problems. I recommended the name of Dr. Balkrishna Malaviya, A few days back I received yet another letter from Prof. Mothes, stating that although he would be willing to take Dr. Malaviya, the candidates will have to go through the Govt. of India, and he suggested me to procure one of the 10 seats offered by the German Academy of Sciences to Indian students, for Dr. Malaviya. I am writing to Govt. of India in this connection. I wish that you would please help Dr.Malaviya in getting one of the 10 aforesaid awards.

I hope this finds you in best of your health.

With best wishes,

Yours sincerely,

S.Ranjan
