

SMITH COLLEGE  
NORTHAMPTON, MASSACHUSETTS  
DEPARTMENT OF PHYSICS

Dec. 13. 1946

Dear Professor Krishnan

Before you leave for your Homeland,  
I wanted to tell you how great a  
pleasure & privilege it was to  
meet you at Pittsburgh. I shall  
not forget your speech at the  
meeting & your wonderfully stimulating  
conversation - also your great kindness  
to me. Somehow the proteins are  
a large part of life to me - I care  
so much that this problem be  
handled with all the skill &  
knowledge & insight that scientists  
have today. It might mean so much  
in physiology & biology and in the  
domain of abstract thought to uncover  
these secrets of nature.

Please accept from me my  
most grateful thanks and my deepest  
good wishes to you and your beautiful work  
Sincerely & appreciatively yours  
Dorothy Wornick
