Dear Dr. Krishnan,

Physics Department Colloquium

Dr. Jain has kindly shown me your letter about your visit to Leeds. We should very much like you to give a talk at one of our meetings but unfortunately the 29th and 30th June, being the last days of term, are very unsuitable. However, Jain suggests that you may be able to come on 27th June and if this is so we could arrange your talk for sometime in the afternoon of that day.

If this is convenient for you will you please let me know and also let me have a title for your talk so that I may prepare a notice for circulation.

Yours sincerely,

P.L. Marsden

P.L. Marsden.

(Hon. Secretary).

29th May, 1956.

Dear Sir Kariamanikkam,

Physics Department Colloquium

I am very pleased that you will be able to come to Leeds on June 27th.

As regards the subject of your talk Dr. Jain and I think the one on "Optical Properties of ionic crystals" will be the most suitable and have the most appeal to members of this and other departments in the University.

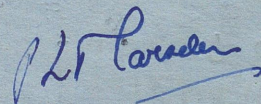

Dr. Jain has told me that you intend to travel over night from London on the 26th June and return on the 27th June. We have looked up the trains and those with sleepers are

St. Pancras (London) Depart 11.50 p.m.
Arrive Leeds 6.20 a.m.

And for the return leave Leeds 2.45 a.m.
arrive London 8.5 a.m.

you can join the train any time after 11 p.m. if you have booked a sleeper. Would you like us to arrange the train bookings for you? If you will let me know I will act accordingly, and will forward the sleeper reservation to the Royal Society as I understand from Dr. Jain that you have your correspondence sent there whilst you are in England. us and is looking forward to meeting you once again. I will also contact Professor Stoner has seen the correspondence between us and is looking forward to meeting you once again. I will also contact Professor Astbury and let him know of your visit.

Yours sincerely,

P.L. Marsden.

Sir K. S. Krishnan, D.Sc., LL.D., F.R.S
Director

Dear Dr Marsden,

Thank you very much for your kind letter. I gladly agree to give a talk on the 27th afternoon at the meeting of the Physics Department Colloquium, at Leeds. Regarding the subject of the talk, I suggest "Thermionic properties of metals and semi-conductors" or alternative "Optical properties of ionic crystals". If it were the first, I would be speaking mostly of the work done by Jain and myself, and Mr Jain may himself like to speak on it, if he has not done so already. I would therefore like him to choose between the alternative subjects, for me.

I am looking forward in particular to meeting Professor Stone, whom I have not met for several years, and Professor Astbury.

With best regards,

yours sincerely

Dr P. L. Marsden
Hon. Secretary
