

THE VALUE OF A TREE

A tree that lives for 50 years
generates Rs. 5.3 lakhs worth of oxygen,
recycles Rs. 6.4 lakhs worth of fertility
and soil erosion control,
creates Rs. 10.5 lakhs worth of air pollution control,
and Rs. 5.3 lakhs worth of shelter for birds and animals
Besides it provides flowers, fruits and lumber.

So, when even
one tree falls or is felled,
the city loses something
worth more than Rs. 32 lakhs!

*Think
before you cut a Tree!*
