

State College.
7. 4. 1955.

my dear Sir.

Received your letter dated 30th of last month and thank you very much for the information that I have been awarded the long cherished degree P.H.D. When I saw your letter, when I picked up my mail my heart leaped with joy to see a letter from so familiar a hand writing. I opened the letter with all the anxiety to read the lines written by such a great and noble man like yourself. I never had any doubt at any time in my life ^{did not} you liked me very much. I always had adored you and conveyed a very deep sense of respect and love in my heart. When I saw your so many thoughts and past memories crowded and I was lost in a maze of past memories. days of doubts and frustration I suffered during my stay in central college. you were always a source of light, hope and encouragement. I have never been disappointed when ever I ~~was~~ approached you for help and guidance. you and Dr. Seetharam are the two people I respect most and adore. then I did not had the good fortune to know under the ideal professors like you two people. I do remember even to this day, how often I used to go to Dr. Seetharam for help and guidance and how at every time, with his characteristic love Uncle has given his help unflinchingly. All these may mean flattery, but this is for the first time I had a chance to express myself.

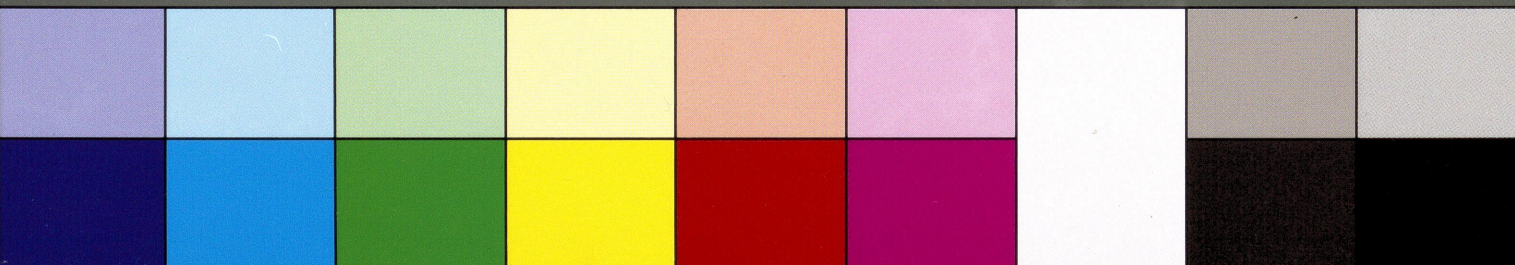

Last week, I had been to New York to attend the meeting of the American Association of Petroleum Geologists. During this meeting a large number of students were interviewed for jobs in American oil companies. I had a couple of interviews with the companies who have their commitments in S. America, Ind. East, India and far east. I may have some hope with Caltex and Arabian American oil companies. My professor here, P.D. Krzywicki enjoys a very great respect with the oil companies and with his help I maybe able to find a job some where. I had written about this to

Dr. Sebhachar.

I am afraid Sir, that the ditch water politics still continues in the vicinity of Mysore. Thank God, Lord gurus Raghavendra, that I have decided in escaping from that quack mire. I may see my fortune outside India. I am sure Sir, you will ~~with~~ welcome this idea.

You were telling me Sir that in the near future you will go over to Princeton as professor of mathematics. please let me know when you will be proceeding to this country, so that I may have a chance to meet you.

FIRST FOLD

Princeton is a nice place and much more warm than State college. A good number of ex-Princeton students are working in our institution and they say that Princeton has a very good school of mathematics.

please accept my deep sense of respect Sir

Yours sincerely,
C. Gundu Rao.
