Dear Suku,

thank you very much for your communication of 16-1-84. I should have known that you are right on the ball again. Congratulations on your work with Huisman. I will be on the look-out for your paper in Biochemical Genetics.

As it looks now, I will arrive in Bombay on March 27, or March 29, the exact date to be fixed before mid-February. I do not know yet which institution I will have to visit. Anyhow, there should be time for a short meeting. I will let you know my exact schedule as soon as possible.

I was glad to learn that your niece is in a high-level institute now and has a good position there. With her training, it would have been a shame to put her to routine clinical cytogenetics work. I had discussed her problem with Mr. Gerzer who is the chief of the foreign relations section of GSF. He told me that a member of GSF, possibly Ehling, would try to get her a position in Professor Bauchinger's laboratory in Munich but apparently nothing materialised. Not so bad, I think, India is such a pleasant country. I am often appalled by the way many Germans treat our foreign visitors.

I am looking forward to seeing you again with great pleasure.

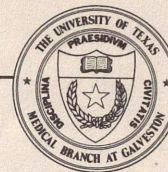

Yours sincerely,

G. Flatz

Dear Suku:

It was good to hear from you at long last. I have presented your nieces's problem to some of my young Indian friends who are working here. They say that she can easily get along with \$16,000/yr. She can probably get a dormitory room for \$250/mo., or an apartment for about \$350. Other living costs should be about \$400/mo, so she can put aside enough for her return expenses.

Houston is about 60 miles from Galveston. Unfortunately, the transportation is not the best, but bus service is available and I could meet her at the bus station. I hope she will come visit me. My phone number is (409) 762-6190 and I am usually home until 10 A.M.

WE were all saddened at Hermann's death. I understand there is to be a meeting in his honor in Cambridge (or London) about Sept. 6. The announcements have not gone out yet, and you will doubtless receive one when they are ready.

I am going to the Hematology meetings in New Zealand and Australia in May. Are you? Hastily.

Best regards,
