My dear Parthasarathy,

I think that it would be advisable for us, as a Central
Institute, to maintain ^{in genetic} strains of ^{so} Drophila for teaching
purposes. I should be glad if you would examine this
possibility and let me have your proposals.

Yours sincerely,

B.P.Pal

My dear Parthasarathy,

In view of the interest being taken in the subject
~~would~~ should we not take up a few small-scale but critical
experiments on "grape hybrids" ?

Yours sincerely,

B.P. Pal

My dear Parthasarathy,

There are a number of crops (jowar, bajri, etc.) where we are not able to make any recommendations for farmers in Delhi State. Will you please discuss this with me at a very early date ?

Yours sincerely,

B.P. Pal
