Dr. K. Bahadur,
Department of Chemistry,
University of Allahabad,
Allahabad, India.

Dear Dr. Bahadur:

I would appreciate very much receiving a reprint of each of your publications dealing with the synthesis of amino acids by photochemical action, especially the one on peptide formation published in Izvest. Akad. Nauk. U.S.S.R., Otdel Khim. Nauk. 1361 (1958). The experimental work we are carrying out follows similar lines as yours.

Let me say in addition that if you have any graduate student that wishes to pursue studies towards an advanced degree here at the University of Houston we would be very glad to receive his or her application. We have assistantships for students working towards advanced degrees, and at present several graduate students and post doctorates from India are working in our department.

Hoping to hear from you at your earliest convenience.

I remain,

Yours sincerely,

Sd, John F. Oro,

Associate Professor of Chemistry.

Allahabad-2 India.

Dear Dr. Bahadur,

Some of the experimental work that you have published on the photochemical synthesis of amino acids has been confirmed in our laboratory, and we are very much interested in proceeding further in this field of research.

We would like ^{to} discuss personally the problems concerned with this experimental work, and for this reason we take the liberty of extending to you a personal invitation to visit our laboratory whenever this may be possible to you.

If you wish to pursue these studies here while you are at the University of Houston, we will be very pleased to make the necessary arrangements so that your visit to the United States is both comfortable and scientifically fruitful.

Let us hear from you at your earliest convenience if you wish to accept our invitation.

Very truly yours,

Sd, John F. Oro,

Associate Professor of Chemistry.
