

Senate House  
Calcutta

20. 1. 22 -

Mr B. S. Madhava Rao distinguished himself at the last M.Sc. examination in Pure Mathematics of the Calcutta University - with Theory of Functions of a Complex Variable as a special subject. He joined the Post Graduate classes of the Calcutta University - after having obtained the B.Sc. degree of the Mysore University. He is desirous of completing his mathematical studies at ~~the~~ Paris with the help of a Foreign Scholarship from the Mysore Government for which he wishes to apply. I consider him eminently deserving of such a Scholarship and that it can be bestowed on him with full confidence of his abilities to turn it to best use academically.

Syamadas Mukherji  
Professor, Calcutta  
University.
