My dear Ram,

I received your telegram today. I had already sent the research statement to Delhi but I am enclosing another four copies for you.

Let me make it clear that I am not very sure that I will take this fellowship if I am awarded. I have taken this step as a precautionary measure. There is a possibility that I have to leave my present job in Feb / March and then I may again be unemployed. In case I do not get any other suitable job, then I ~~will~~^{may} accept this fellowship. So I am leaving it, at your discretion. ~~is~~, it must not be obligatory on my part to accept it if awarded. I hope you will do, what best should be done.

Hope, other things are alright. Remember us to Sushama and love to Hement.

Yours truly
J. L. Mittal.

My dear Sam,

It has been quite some time since we received my letter from you. I hope things are setting quite well with you and your work is progressing well. Unfortunately I have not been able to adjust myself with the present conditions and so I am not able to progress. It is rather advanced in their direction. I am enclosing an application form for a post doctoral fellowship of NIS which if you find suitable, ~~is~~ kindly get it forwarded through your Director and post it to NIS. The last date for the receipt of application is June 5.

I do not remember how many mail bundles are left with you but if they are not very many, probably you may send them through Bank-Post. How are Hement & Sushama? Convey my regards to her and love to Hement.

Yours truly
M. L. Mittal
