

Dear Krishnan

I return herewith the papers you showed me. I have only had time to race through them and I am afraid the main conclusion I have reached is that I have forgotten even more physics than I thought I had! So the principal effect has been to remind me of a number of things about reciprocal lattices and Brillouin zones, but unfortunately not to an extent which would allow me to make any criticism of your work. So I will only say that it seems to me a very valuable approach to an important and interesting field, and to wish you success in its pursuit.

I hope to see you again sometime in London.

Yrs sincerely  
C Darwin
