9th January 2006

Respected Sir,

I am glad to introduce to you ~~The~~ Ecological Society and its work in environmental education & research. As environmental education is now made compulsory by various governments under instructions from the Supreme Court, there is pressing need for developing proper faculty to take up courses at the University level and trained teachers for high school and under graduate levels.

The Society has started work along these lines with the help of some private trusts such as the Sir Ratan Tata Trust. It now needs to develop proper infrastructure to our teacher training programme as well as conduct under graduate & post-graduate courses in ecology & environment.

Can we look upon Satya – Sai University to help us out?

Thanking you,

Yours sincerely,

Prakash Gole
Director
