Date 27th April 19 61.

Dear Dr. Krishnan,

I hope you have received the letter that I sent to you to Delhi on 25th inst. I do not know how long the meeting of the Council will last, and as you are coming from a long distance, I suggest that instead of going over to Dr. Mudaliar's residence and then to lunch, you go over from the Airport direct to the Institute, and have lunch, and rest yourself. As soon as the Council meeting is over, I shall come back to the Institute and meet you. I trust this will suit you.

My colleagues, Professor Rao and Professor Pandalai will meet you at the Airport and bring you over to the Institute.

With best regards,

Yours sincerely,

K. Sreemivasan

Dr. K.S. Krishnan,
Camp: Chromepet.

12th Feb.

Dear Sir Krishnan,

Your letter of 31st January came in as a pleasant surprise on 9th Feb., and I have read the note by Mr. Venkatesan. The tuning condenser that he uses has, he says, a maximum and minimum values of 550 and 50 p.p.f. ~~So that~~ A change of 0.001 p.p.f. ~~is either~~ means 1 part ⁱⁿ 50,000 and 1 part 500,000 respectively. This ~~is~~ does not seem to me, at first sight, ~~to be~~ very easy, ^{to detect} using the resonance curve at its top ramps. If Mr. Venkatesan is not in a hurry, I shall think over the matter and ~~then~~ ~~write~~ write to you again about the end year merits. The reason for this delay is that just now, my hands are rather full with the work ~~that~~ at the end of the session.

It is now 23 years since I first went to Calcutta in 1924. Though an entire stranger to you and to Calcutta, you were good enough to help me very generously. That act of kindness on your part is always with me and will remain in my mind.

I had recently two letters, one from Dr. R. W. King, New York and ~~the~~ one from Dr. ~~Carne~~, Schenectady. They mention

having met you during your visit to the U.S.A. I hope you had
an enjoyable and very useful time.

With greetings and regards,

Yours Sincerely

K. Sreenivasan

Sir K.S. Krishnan, D.Sc., F.R.S.
