

7/5-

From : R. Jayaraman
Department of Chemical Engineering
Massachusetts Institute of Technology,
Cambridge 39, Mass. U.S.A.

Dear sir,

May I introduce myself as Jayaraman, ex-student and asst. professor, Benares Hindu University. I am sure you will remember that I was selected by the Government of India for higher studies in this country and my early departure to this country was made possible by your kind help. I have just finished two terms of my work here and am getting on quite well.

A week back I received a letter from Prof. McBain, Director-Elect of the National Chemical Laboratory to the following effect. "I understand that you are one of the promising students selected for advanced training in the United States, but not available until the autumn of 1950. It is quite probable that there will still be vacancies on the staff of the National Chemical Laboratory now under construction at Poona, and if so, I should like to have your name amongst those to be considered in competing for the openings at that time. Sometime, therefore, I should be much obliged if you send me in duplicate a statement of your training and qualifications and publications, if any so that I may have them on file." I have sent such a report today and have given your name as one of the references. I request to be excused for not taking your permission prior to my giving your name and shall be much obliged if you can do the needful when a reference is made to you.

With kind regards,

Yours sincerely,

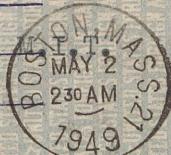

R. Jayaraman

1st May 49.

R. Jayaraman
