My dear Rajan,

It is very thoughtful of you to have written such a supporting letter. I oscillate between tremendous optimism and a feeling of being buried in intrusions which I would rather avoid. But such is a reality and should it be my good fortune to make something out of it, it would be largely because of the confidence and support from friends like you. And rest assured I would need your support, your help and also your expertise for some of the things in future.

With warm regards,

Yours sincerely,

( YASH PAL )
