

Extract from letter dated 26th February, 1954, from  
Dr.T.Rajhathy, Martonvasar, Hungary, to Dr.B.P.Pal,  
Director, I.A.R.I., New Delhi.

-----

" I received your kind letter through the medium of  
His Excellency K.P.S.Menon and was very pleased to hear  
about the possibility of establishing scientific connections  
between our Institutes. We are well informed about the  
work of Pusa Institute from the respective literature and  
we also make use for crossings of the varieties Pusa 4, 7  
due to their extreme earliness. I am well informed of your  
activity through the PBA and highly appreciate it."
