

22, Curzon Road,

XXXXXXXXXXXXXX

New Delhi, June 5, 47.

My dear Hari Rao,

I am sorry for the delay in replying to your letter of May 9, which was by my absence in South India. I do not know the personal leanings of your son, whether he proposes to take up a scientific career or engineering. In the later case the proper place for him will be the Electrical Technology Department of the Indian Institute of Science, Bangalore. On the other hand if he is keen of an academic career an M.Sc. in Physics is the obvious indication. He may join the Royal Institute of Science, Bombay where, I presume, they have provision for taking M.Sc. by research.

If you wish to send for an orthodox M.Sc. course in Physics I shall be glad of admit him At Allahabad. But the University will insist on a first class B.Sc. degree for students outside Allahabad.

With kind regards,

Yours sincerely,

Raghoba Nivas

My dear Sir Krishnan
you will be surprised
to get a letter from me.
You know the world
much better than I do,
and so I am seeking
your advice about my
son. He has appeared
for the B.Sc. Exams. of
the Bombay University this
year (Physics - main; Mathematics
subsidy).
What do you think he
should do now? Supposing
he wants to pursue his

Physics student
which University
recommend for his
M.Sc. ?
quarters
would you

I hope that you
are enjoying good health.

Yours
Harirao
