Dear Ram,

I would like to thank you for your kind hospitality. I really enjoyed my visit in PRL very much and hope to come again soon. Meanwhile, we would invite you to visit us as soon as possible, e.g. in June.

We are continuing the numerical calculations. In a few weeks I hope to be able to send you some clear pictures for the transitions with varying  $M$ . I still find the problem interesting and I still hope that we all together can clarify (or verify) the picture!

Please convey my best regards also to your wife and the two children.

With best regards

Sincerely yours  
Karl
