Dr Niranjan V. Joshi  
Centre for Ecological Sciences  
Indian Institute of Science  
Bangalore 560 012

Dear Niranjan,

I have requested my colleague Dr Sharma to look at the book mentioned by you and also to discuss with Yateen regarding our biogas slurry project. A few days ago I also met Dr. R.C. Maheshwari from CIAE (he is coordinating a project related to biogas slurry for ICAR) and discussed our project. He agrees that the information available is not adequate to come up with some guidelines for different regions.

If it is feasible can you please send me a set of papers presented at the Workshop on Decentralized Energy for Integrated Management of Natural Resources. Also could you request Dr Ravindranath to send his training material in Kannad.

Kishore's visit to Bangalore had to be cancelled as he has some work in Bombay which has higher priority. This Bangalore seems to be eluding us. I have not written to Prof Madhav Gadgil because I am unable to find a slot of ten days away from workplace and home. I do hope I will be able to find it at least early next year. Sumeet is in Garhwal trying hard to get some data.

With best wishes,

Yours sincerely,

  
(VEENA JOSHI)
